Introduction to this guide

The Operational Guidelines have been designed to help Suppliers, Providers and other relevant stakeholders to understand and implement the Integrated Services for Sensitive Claims (ISSC) contract. The ISSC contract is a Client-centred service focusing on maximising the functional and wellbeing outcomes for all survivors of sexual abuse and assault who seek assistance with ACC.

The service is purposefully flexible because we know each person is unique in their needs and ability to participate in recovery services at different times. With this comes the need to provide guidelines for Suppliers and Providers in the key elements of the service and clear direction with regards to process, day-to-day operations and expectations.

These guidelines are not intended to provide the user with specific clinical advice. In 2008, ACC produced the ‘Sexual Abuse and Mental injury; Practice Guidelines for Aotearoa New Zealand’, known as the Massey Guidelines. These Operational Guidelines should be read alongside the Massey Guidelines, which provides clinical and therapeutic guidance.

These guidelines also serve to assist with operationalising the requirements of the ISSC Service Schedule. They can be a point of reference and can be used to help clarify differences of interpretation of various aspects of the services. It’s important to note that where there is a conflict or inconsistency between these Operational Guidelines and the Service Schedule, the provisions of the Service Schedule take precedence.

This is a living document. Updated versions will be made available as the need arises and published on the ACC website. We are committed to on-going service improvement and changes may be made from time to time to reflect these.
Introduction to the ISSC Service

Purpose

The purpose of the ISSC service is to help people affected by sexual abuse to achieve recovery and wellbeing. The service was designed to ensure immediate access to high-quality, outcome-focused support and interventions and aims to enable ACC, Suppliers, Providers and Clients to work together in a flexible, supportive and safe manner.

The ISSC Service has been designed with the Client and their family and whānau at the centre and comprises a range of services that can be tailored to meet a Client’s individual needs.

We want the service to:
- support Providers to deliver the right service at the right time and collaborate with other parties involved in Client recovery.
- respond to cultural diversity.
- be responsive to individuals and provide for various levels of intervention based on need.

We want our Clients to:
- have access to services when they need them.
- have the opportunity to develop early therapeutic relationships with the Provider that best suits their individual needs.
- receive services at a pace that works for them.

For Suppliers and Providers this means:
- the ability to tailor therapy for their Clients.
- support from ACC.
- delivering an end-to-end service for Clients.

For ACC this means:
- effective working relationships with Suppliers and Providers.
- streamlined services that will enable timely recommendations to support the Client.

For all of us it means an opportunity to work together effectively, supporting the Client every step of the way.

Service objectives

At the service level the following objectives underpin the ISSC contract and service:

- Client-centric – Suppliers, Providers and ACC are expected to deliver these services collaboratively, with the Client at the centre.
- Flexible – Clients are offered flexibility in how they access and engage with services, and how they progress through the services.
• Diverse – The services acknowledge and accommodate the diversity of Clients, and the influences of factors such as culture, ethnicity, gender, age, etc., as well as the needs of their family and whānau.

• Appropriate – The model features checks and balances to ensure provision of services is both clinically appropriate and appropriate for the Client.

• Responsive – Services must acknowledge and support the many ways that Clients need to engage and be responsive to the need for immediate access and changing needs over time.

• Safe – The service will recognise that the safety of the Client and relevant others is paramount throughout the therapy process.

Service overview

We want Clients to feel supported to engage with recovery services at a time and pace that works for them.

The ISSC service has five key stages:

1. Engagement which includes Getting Started, Early Planning, and Support for Next Steps.

2. Support to Wellbeing (short term) for early support and intervention rather than treatment via determination of mental injury cover.

3. Supported Assessment which integrates a high level of support with assessment of mental injury (including cover determination).

4. Support to Wellbeing which includes treatment provided after a mental injury claim has been accepted and includes a range of necessary services to assist the Client in achieving their outcomes including one-to-one therapy and group-based therapies.

5. Maintaining Wellbeing which focuses on Client self-management and easy access to 4 hours annually for the next three years to maintain gains made in active therapy.

A Client may also receive support services in the form of Social Work and Family & Whānau Support and the provider may utilise Cultural Advice and Active Liaison (prior approval required) once the Early Planning report has been submitted to ACC.
Your relationship with ACC

In providing the ISSC Service, we want to work with our Suppliers and Providers so that Clients gain maximum benefit from the ISSC Service. This is supported through timely and open communication between ACC and Suppliers and Providers wherever possible.

Individual Client queries or issues should be resolved with the ACC team member supporting the Client in the first instance. If unable to be resolved, issues should be raised with the appropriate Team Manager.

Roles and Responsibilities of ISSC Suppliers and Providers

<table>
<thead>
<tr>
<th>Supplier</th>
<th>Provider</th>
</tr>
</thead>
</table>
| **Capacity and referrals** | • Manage and understand the capacity of all Named Providers at any given time  
• Ensure that contact details on www.findsupport.co.nz are correct at all times  
• Complete applications to add new Named Providers to ISSC contract or to extend the services a Named Provider is approved for. | • Keep Supplier informed of current capacity  
• Advise Supplier when unavailable due to planned or unplanned leave (e.g. holidays, away due to injury or illness). |
| **Invoicing and payments** | • Receive Purchase Orders (POs) directly from ACC (Providers will be copied into purchase order approvals by ACC).  
• Manage all Provider queries regarding invoicing, PO dates, how many sessions have been used and timeliness of reporting  
• Submit invoicing to ACC  
• Ensure that providers are paid | • Manage timeliness of sessions and reports as per the PO  
• Direct any PO queries to the Supplier – not ACC |
| **Reports** | • Ensure that all reports submitted to ACC meet the criteria for content and quality as per the contract and Operational Guidelines  
• Ensure Providers are submitting reports to ACC within the timeframe of the approved purchase order  
• Ensure that reports are only | • Submit all reports on ACC approved templates  
• Submit reports to the specified ACC email address: sensitiveclaimsproviderreports@acc.co.nz  
• Ensure all sections within the report are completed as per the Operational Guidelines |
Health and Safety

Working with Clients who may pose a health and safety risk

ACC may not always have access to detailed information concerning a Client’s history, but if a Client has been identified as posing a risk, ACC will be able to provide information relevant to your role in managing the claim to help you mitigate health and safety risks to service providers and others.

ACC Clients who meet two or more of the following criteria are considered to pose a potential risk to safety, and will have a Care Indicator activated by ACC:

- Have continued to demonstrate intimidating and/or offensive behaviour (e.g. body language and verbal dialogue has made employees feel unsafe)
- Been abusive, verbally or in writing
- Made racist or sexist comments
- The current actions being undertaken on their claim by ACC are known to have caused or are expected to cause a significantly negative response from the Client. For example, Prosecution, Fraud Investigation, cessation of Weekly Compensation, etc.

Clients who meet any one of the following more serious criteria are also considered a health and safety risk and will also have a Care Indicator activated:

- Have been or are physically violent (this unacceptable behaviour may not have occurred directly towards ACC employees)
- Have a history of violence or aggressive behaviour, have known convictions for violence
- Made threats previously against ACC, ACC employees or agents acting on ACC’s behalf
• Intimidated an employee through written abuse or verbal abuse (face-to-face or over the telephone) to the extent they felt unsafe
• Exhibited homicidal ideation.

Communication regarding care indicated Clients

The ACC team member supporting a care indicated Client will advise you in writing, either:

Prior to your initial contact with the Client, or

If you are already providing services to the Client, as soon as possible when ACC becomes aware of you seeing the Client or receives new information about Client risk.

If you decide that a security guard is required because of concern about your own or your employees' safety, please contact ACC to arrange the security guard. Guards can be arranged at any initial or subsequent appointment.

Please report any threatening behaviour to the police immediately if you feel that it is warranted in the circumstances and advise ACC and any other parties that are at risk as soon as possible.

All threats by ACC Clients or their representatives must be reported to ACC in writing using the online form on our website www.acc.co.nz/for-providers/report-health-safety-incidents. We ask that you report these to us so that we can do our part to protect the safety of our staff and other providers that are working with the Client.

Stopping a Client session

Your safety is the highest priority and any session with the Client should be terminated if the Client, or their representatives cause you to feel threatened or unsafe.

If you choose to continue with treatment or assessment of a care indicated Client, and wish to employ a security guard then please contact ACC.

If you would like to stop seeing a Client due to safety concerns, please notify ACC as soon as possible and fully document the reasons for the termination of the treatment or assessment in your report. Please report to ACC in writing using the online form on ACC’s website.

Reporting health and safety risks and incidents

Health and safety risks and incidents including notifiable events (as defined by WorkSafe); threats and other health and safety risks must be reported to ACC using the procedure and online form on our website www.acc.co.nz/for-providers/report-health-safety-incidents.
Client safety

Suppliers and Providers have a responsibility to identify risks and assist the Client in maintaining their safety. Providers should ensure that the Client has a risk management plan where risks have been identified and that appropriate referrals have been made (e.g. to Police, acute mental health services, Oranga Tamariki).

Providers also need to notify ACC of any risks, of the risk management plans and the details of any referrals that have been made. Providers should also inform ACC where:

- The Client has been referred to acute services such as an inpatient hospital admission or services from a Crisis Assessment & Treatment Team.
- The Provider has identified a Client safety issue such as risk of harm to self or others and has developed a risk management plan.
- The specific details of the individual risk management plans will depend on a range of situational and Client factors but likely will involve some combination of responses such as:
  - Following through on the duty to warn others who can assist in reducing risk (e.g. Police, Oranga Tamariki, family and partners, if appropriate).
  - Referral to and involvement of others (e.g. Acute mental health services).
  - Increasing contact with the Client to achieve stabilisation or until other referrals have been actioned.
  - Use of supervision to support the Provider to clarify and document actions

Health issues for Suppliers and Providers and safety for Clients

Providers have the responsibility to inform their Supplier and their own clinical supervisor of any significant personal or health issues that have the potential to impact their ability to work safely and effectively with Clients. Such issues might include physical health problems, significant stressors, or mental health difficulties significant enough to require treatment. They should also inform their treating clinician of the nature of their work so that any treating clinician can factor this into their treatment advice.

Where the Supplier is the provider, they are responsible for informing their own clinical supervisor and treating provider of any significant personal or health issues that have the potential to impact on Client care as noted above.

Suppliers have the responsibility to ensure that where such issues are identified, there is a broad plan in place via the Provider’s clinical supervisor or any treating clinician to ensure that on-going Client and provider safety is monitored and ensured.

Where a Provider requires a period off work to recover it is anticipated that they would work with ACC and their Supplier (if they are not themselves the Supplier) and their Clients to identify any Clients that would require transitioning to a new Provider and to ensure that any affected Clients were transitioned appropriately.
Suppliers and providers have obligations in relation to the professions covered under the Health Practitioners Competency Assurance Act (HPCA). Section 34 of the HPCA obliges health practitioners who identify risk of harm in a provider to notify the respective board in writing. Section 45 of this Act obliges the person in charge of the organisation providing health services, or who is an employer of a health practitioner to notify the board promptly if they have reason to believe a health practitioner is unable to perform the functions required of that profession.

Where a profession is not covered by HPCA and a risk of harm is identified, Suppliers and Providers should contact the appropriate professional association regarding the appropriate complaints process.

Concerns about the work of another provider

Very occasionally the situation may arise where a provider becomes concerned about the work of another provider. In these instances, it is the responsibility of the concerned provider to raise their concerns directly with that provider in the first instance and, if necessary, to consider appropriate notifications to that provider’s Supplier, supervisor or professional body if the issue is considered sufficiently significant. Suppliers/providers should consult with their own supervisor and professional body’s ethical requirements when considering such notifications.

Providing services for children and adolescents

Only those Suppliers and Providers who have specific expertise and experience in working with children and adolescents, and their families and whānau may work in this area. Registration boards and professional associations stress that practitioners should practice only within their areas of competency.

The needs of children and adolescents must be carefully assessed. Providers for children and adolescents must have a good level of knowledge about human development and must be able to identify each child/young person’s specific needs incorporating the wider family and whānau’s context as required.

Suppliers/ Providers must be able to work with children/young people with a range of disabilities and be aware of the services which are most appropriate. While ACC may not be responsible for particular physical and cognitive disabilities which a child/young person may present with, the impact of these disabilities should be included in the proposed assessment and treatment and discussed with ACC.
ACC and Service Concepts

Definitions and Interpretations

Please refer to Appendix 2

ACC Cover

Under the Accident Compensation (AC) Act 2001, a mental injury is defined as a clinically significant behavioural, cognitive or psychological dysfunction.

A claim for mental injury caused by sexual abuse or assault is called a sensitive claim. ACC can provide cover on a sensitive claim where:

- There has been an event of sexual abuse or assault(s), or ‘certain criminal acts’, as listed in sections of the Crimes Act 1961 and Schedule 3 of the AC Act 2001, and
- there is a mental injury and the sexual abuse / assault event(s) is a material or significant cause of that mental injury, and
- the event occurred in New Zealand or, if the event occurred outside of New Zealand, the Client was ordinarily resident in New Zealand when the event occurred.

Unlike most physical injuries, cover for a sensitive claim is not provided immediately on lodging the claim as each of the factors listed above need to be determined. In 2010 ACC introduced immediate support for people who lodged a sensitive claim to ensure they received help while this process was undertaken. The ISSC also ensures that support and assistance is provided ‘pre-cover’ and throughout the cover determination process. For some Clients immediate assistance and support may be all they need, and they may choose to withdraw their claim without having cover determined.

Why is Cover important?

Once a mental injury is covered under a claim, ACC can provide any treatment for that injury that is determined to be ‘necessary and appropriate’ and of the quality and frequency required to help the Client. Under the ISSC this includes the services available under Support to Wellbeing and Maintaining Wellbeing.

If a Client requires access to social rehabilitation, vocational rehabilitation or compensation, they must have a ‘covered’ claim. For definitions on what a ‘covered’ claim is please refer to the definitions in Appendix 2 of this document.

It is important that if a Client needs to access ACC entitlements, such as financial compensation or social rehabilitation services, they progress through the initial pre-cover process in a safe and timely manner.

Many entitlements have eligibility criteria of their own and it is therefore important to liaise with ACC to determine whether a Client may be eligible to receive a specific entitlement.
Refer to Appendix 1 for some frequently asked questions related to ACC funding and eligibility.

Cover status

The status of a Client’s claim at ACC can be

- Held (where we have not yet made a decision on whether to accept or decline the claim and we often refer to these as ‘pre-cover’)
- Accepted (where the claim has met our criteria for cover)
- Declined (where the claim has not met our criteria for cover)

More about declined claims

Claims are declined when they do not meet our criteria for cover under the AC Act 2001. However, in some cases we decline claims because we do not have enough information to make a decision as to whether the claim meets the criteria. We will work with Suppliers and Providers as much as we can to ensure we have all the right information to assist with this decision. When a Client chooses to withdraw their claim before cover is determined we also must make a decision on their claim. This will result in a declined claim. When we write to the Client advising them of this decision, we will explain the reasons.

Another example is when the Client chooses to go to Support to Wellbeing (short term) instead of progressing for a Supported Assessment. We will decline the claim as the Client has chosen not to have cover determined via a Supported Assessment and therefore we lack the information to make a decision as to whether the claim should be accepted.

We will work together with Suppliers and Providers to help Clients understand our decisions and to support them through this process. It is important that the Supplier, the Provider, and our Clients understand that if we decline claims in these circumstances, we can re-open their claim if they re-engage or decide they need further support at a later stage.

Cover time frames

Sensitive Claims are considered ‘complex’ claims and ACC has an extendable amount of time in which to make the cover decision. There are some specifics around this that are important to note:

- Under Section 57 of the AC Act 2001, we have two months (60 days) from the time of a new claim being lodged to make a decision as to whether we accept or decline a claim.
- First Extension: We may extend this time to four months if we notify the Client that we require more time, which we will do as a matter of course if the Client is still engaged in pre-cover services.
• **Second Extension:** If we need to extend the timeframe further, we must ask the Client’s permission to apply a further extension to their claim’s cover decision. This can allow ACC up to nine months from the date the claim was lodged to issue a final decision.

• To make this easier, we’ve attached the relevant permission forms to the Early Planning documentation (ACC6242 or the ACC6422). Clients can choose to give us a total of nine months to make a decision, or an extension length of their choosing, or no extension.

Regardless of the Client’s decision, under legislation, ACC must issue a decision on whether to accept or decline a claim at the end of the allowed time frames. The decision will be made based on the information we have at that time. We will always make a decision as quickly as possible. The Client has the right to review any decision ACC makes.

The diagram below illustrates sensitive claim cover timeframes

These cover time frames only apply if the claim is a new one. If the claim has been previously declined and has now been reopened, these time frames do not apply, and the Client does not need to complete that section of the confirmation form.

---

**Authority to collect Client information**

Client and ACC authority

We collect a Client’s information to help determine whether we can accept a claim and, if the claim is accepted, what services and/or financial compensation can be provided. The Client’s authority for us to collect this information must be obtained before any information can be collected.

ACC applies the following principles when collecting a Client’s information. We will:

- obtain the authority we need, when we need it
- specify what information we need and why we need it
- return or destroy information we receive that we did not request
- use information solely for the purposes we specified when we requested it.
A Client’s authority is obtained at the following stages:

1. At Getting Started, when the electronic engagement form is completed and submitted to ACC.
2. When the Client and Service Provider have determined that a Supported Assessment is required, and an ACC6300 ‘Authority to collect medical and other records’ is completed and sent to ACC.
3. ACC may obtain the Client’s authority directly at other stages too if the previously obtained authority is no longer considered valid.

Engagement form authority

The engagement form cannot be submitted without the Client’s authority. In keeping with the principles above, the engagement form offers the Client two authority options:

If they decide they don’t want any further support after ‘Getting Started’:

- They only need to give their authority for the therapist to lodge the engagement form with ACC.
- ACC will contact them to let them know we will not do anything further with their claim, including collecting any other information about them and the claim will be declined at this time.
- We will let them know they can come back for further support at any time.

If they decide they would like to receive further support (i.e. beyond ‘Getting Started’):

- They will need to give their authority for the therapist to lodge the engagement form with ACC and for ACC to collect medical or other records (this includes engaging in conversations with medical providers as well as actual medical records).
- This allows for information to be gathered during the period of the Client’s Early Planning sessions. Only information that is directly relevant to informing the Early Planning can be gathered sessions at this stage.
- If the Service Provider or ACC need to speak to any other individuals or organisations, they must contact the Client to obtain their verbal or written agreement.

The service provider’s role

The Service Provider completes and submits the engagement form on behalf of the Client. The Service Provider is responsible for explaining the engagement form, including the authority options, to the Client. ACC has created an information card to help the Service Provider explain the authority options and to give to the Client to take away if they wish.
ACC6300 ‘Authority to collect medical and other records’

If a Client requires longer-term support and treatment and/or financial compensation, then an ACC6300 ‘Authority to Collect Medical and Other Records’ form must be completed and signed by the Client and returned to us. The ACC6300 authority allows for the collection of information to help inform the Supported Assessment and/or Incapacity Assessment. ACC expects the Provider to talk with the Client about the ACC6300 and facilitate this being sent into ACC with the Early Planning Report.

If the Client is unwilling to complete and sign the ACC6300, they have the option of agreeing a personally tailored authority with ACC. The Client will need to contact ACC directly to discuss this option.

Complying with the legislation

ACC will comply with the Privacy Act 1993, the Health Information Privacy Code 1994 and the Accident Compensation Act 2001 when collecting, using and managing the Client’s information.

Under the Privacy Act 1993 and Health Information Privacy Code 1994, the Client has the right to access any information ACC holds about them. The Client can also ask ACC to correct any information they deem to be incorrect and if this is a report from a Provider, ACC can ask the Provider whether they are willing to modify any factual incorrect information contained in the report. Providers would not typically alter their clinical opinion unless this has been based on incorrect information. ACC’s privacy notice can be found at www.acc.co.nz/privacy.
Entering the service

Clients can access the service directly or they can be referred by someone else such as:

- their family or whānau
- a general practitioner
- a victim support agency
- another Supplier
- ACC
- Government agencies e.g. Oranga Tamariki

You need to ensure that you identify ISSC Clients at the initial point of contact, so that you won’t need to discuss funding and can work with them to determine the most appropriate Provider. It is important to establish what kind of Provider or support they are looking for and that they understand what a “sensitive claim” is.

If you are unable to accept the referral, or you have a “waitlist” of Clients, you need to ensure that the Client is informed of the waitlist, and the option to visit the www.findsupport.co.nz website and engage with another Supplier, or contact ACC directly.

If the referral comes from ACC, you must accept or decline the referral within two business days. Please send your response via email.

Returning Clients

Where a Client has presented at an ISSC Supplier to access services under a previously lodged claim, they are regarded as a ‘returning Client’. The Client may have never received therapy or support or alternatively they may have completed a course of treatment.

To activate a new ‘period of engagement’, the Provider will complete a new engagement form as part of the Getting Started service. (Refer Getting Started section)

ACC Supplier web search – www.findsupport.co.nz

Potential Clients or referrers with Clients seeking to use the ISSC service may use the web-search function to identify a Supplier that is likely to meet their needs.

Clients using the Search Tool can filter against criteria which identifies a Supplier who has Providers that meet their needs. For example, if a Client is looking for a Provider that is female, speaks Te Reo and provides services in Wellington City, the web search will return the names of those Suppliers that have Providers with each of these characteristics and skills.
If the Client has contacted you after choosing you from the web search it is helpful to talk to them about the criteria they used to find you, to more clearly understand their needs.

**Summary of time frames**

To ensure Clients receive timely services, the following timeframes apply:

<table>
<thead>
<tr>
<th>Action</th>
<th>Response Time frame</th>
</tr>
</thead>
<tbody>
<tr>
<td>Supplier accepts or declines the referral and lets ACC know</td>
<td>Within two business days from receipt of referral (when ACC refers) or from the initial contact of the Client (when Client contacts directly)</td>
</tr>
<tr>
<td>Supplier allocates referrals to a Provider</td>
<td>Within one business day of acceptance by the Supplier</td>
</tr>
<tr>
<td>The first appointment arranged between the Provider and Client</td>
<td>Within five business days from receipt of referral by the Supplier (unless otherwise requested by the Client)</td>
</tr>
<tr>
<td>First face-to-face Getting Started appointment with the Client</td>
<td>As soon as possible</td>
</tr>
</tbody>
</table>

Please let us know if you cannot provide the service according to the above time frames.

**Declining referrals**

You may decline a referral

- where a conflict of interest exists
- where you have no capacity; or
- where the Client’s needs would be better met by another ISSC Supplier, for example a specialist child and adolescent Provider.

If you decline a referral, you should help the Client find a suitable alternative Supplier. If you can’t find a suitable alternative Supplier, please contact ACC.

You must keep a record of all declined referrals and the reasons for declining. This information needs to be included in your quarterly reports.
Capacity Issues

It is important that Clients are seen in a timely manner. While it is your responsibility to ensure on-going capacity to respond to referrals, we need to know when this is becoming a problem so that we can work together to look at options for increasing capacity or plan for the best way to manage incoming referrals.

In the first instance, notify your local Engagement and Performance Manager, and provide details of how many Clients are on your wait-list, the average wait time for an appointment, how the waitlist is being managed and whether there are any plans to increase capacity by adding new named providers onto the contract.
Primary Services

There are seven different service items:

1. Getting Started
2. Early Planning
3. Support for Next Steps
4. Support to Wellbeing (Short Term)
5. Supported Assessment
6. Support to Wellbeing
7. Maintaining Wellbeing
# Getting started

<table>

<td>Process</td>
<td>1. The Provider will contact the Client to arrange an appropriate appointment time.</td>
</tr>
<tr>
<td></td>
<td>2. The Provider will meet with the Client up to a maximum of two hours to provide the Client with the opportunity to engage with ACC-funded services.</td>
</tr>
<tr>
<td></td>
<td>3. If ACC didn’t refer this Client, the Provider needs to advise us of the Client’s decision as to whether to progress with ACC-funded services using the engagement form. This is required to get the purchase order for the Getting Started sessions issued.</td>
</tr>
<tr>
<td></td>
<td>4. Where the claim status differs from what the Provider has</td>
</tr>
</tbody>
</table>
stated, ACC will contact the Provider to discuss this.

5. Where the Provider believes there may already be an existing claim for the Client, the Provider will contact ACC directly to obtain the claim number, and to clarify the event dates.

6. Where the Provider has raised any concerns or asks to be contacted by ACC, ACC will contact the Provider within two working days of the engagement form being submitted.

7. ACC will automatically issue a purchase order for the Supplier named on the engagement form.

8. Where the Client has indicated that they do not want further assistance the purchase order will be for the ‘Getting Started’ service only. Otherwise, the purchase order will be for ‘Getting Started’ and ‘Early Planning’ services under the vocation type of the Provider who submitted the engagement form.

9. Where the Client has indicated that they do not want further assistance, ACC will decline the claim at this time.

Note: The Client may not be contacted directly by ACC until after the Early Planning report has been received unless specifically requested.

Service requirements

1. The Provider meets with the Client face to face for up to two hours and discusses the ACC process with the Client, what services they can offer the Client, and what the options are for the Client.

2. The Provider ensures that they complete an engagement form so that the Client can access this service item. The engagement form should be submitted to ACC in a timely manner following the last face to face session.

3. The Provider ensures that all relevant information is provided to ACC via the engagement forms (or by alternate means where this is not appropriate).

4. Where a Client does not wish to proceed further with the claim at this time, the Provider should ensure that the claim form specifies ‘No Assistance Required’.

5. Providers explain the ACC Authority to Collect Information principles to ensure the Client understands what information we need and why we need it.

6. The Provider ensures that the correct Supplier has been entered onto the engagement form before submitting to
<table>

# Early Planning

<table>
<thead>
<tr>
<th>Service name</th>
<th>Early Planning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Objective of the service</td>
<td>The objective of this service is to identify the current needs of the Client and work with the Client to determine the most appropriate service(s) to address those needs.</td>
</tr>
</tbody>
</table>
| Who is this service for? | Clients who have completed a Getting Started service:  
- New Clients who have recently lodged a claim with ACC, and do not have a covered claim.  
- Clients who have completed sensitive claim services funded by ACC but need to return to Getting Started to gain longer-term support.  
- Returning Clients who have previously received sensitive claim services funded by ACC but disengaged from those services (whether with the same Supplier or a different Supplier).  
- A relocating Client who is currently receiving services elsewhere but has engaged via a new Service Provider.  
- Existing Clients who have had a significant enough change in need that the type of services they are receiving, needs to be revised. |
| Who performs this service? | An approved ACC Service Provider who is the Client’s Lead Provider.  
(Input may be required from other Providers who may be involved in delivery of further services.) |
| Incoming information | Relevant clinical records that may help in the planning of onward services. |
| Information submitted to ACC |  
- `ACC6426 Early Planning Report`  
- `ACC6242 Client Confirmation` or `ACC6422 Guardian Confirmation` (this is only required for claims where ACC has not made a cover decision yet)  
- `ACC6300 Authority to Collect Medical and other Records` (where appropriate) |
| Process | 1. The Supplier and the Provider will receive a purchase order from ACC which will include the claim cover status.  
2. The Provider meets with the Client for a maximum of four hours to establish the Client’s needs, agree the next steps and to complete the Early Planning Report.  
3. The Provider will contact ACC if the Client may require ACC funded services outside of ISSC, or if they have any questions about access to other ACC entitlements.  
4. Any services not itemised in the Early Planning purchase order require approval from ACC.  
5. On completion of the face-to-face sessions, the Early Planning Report will be submitted to ACC.  
6. To avoid disruption to the Client receiving services, the Provider will help in obtaining agreement for the cover time frame to be extended by the Client or the collection of authority where this is necessary (see “Cover time frame” and “Authority to collect information” sections of this document)  
7. The Supplier will invoice ACC for the Administration and Management Fee at the end of Early Planning. This fee is payable only to the Supplier who is administering the claim. Unless ACC requires further clarification, ACC will then provide a purchase order for the recommended on-going services. |
| --- | --- |
| Service requirements | 1. The Provider identifies the initial Client needs (for example: cultural advice, family and whānau, school, co-morbidity, work situation or other Client specific need) in enough detail to identify the next service, and provides this information including which Provider will provide the service, how many hours and the rationale within the Early Planning Report.  
2. The Provider clarifies and confirms that the claim event or events meet the criteria of events specified under Schedule 3 of the AC Act 2001.  
3. In the case of a child, the Provider should determine guardianship and who has the right of access to the claim information and ensure that this information is sent to ACC – this information should also be provided within the Engagement Form.  
4. The Provider discusses the ACC process with the Client, including the services the Provider can offer the Client. |
Client and the options for the Client based on their needs.

5. The Provider submits the Early Planning Report to ACC in a timely manner following the last face-to-face session with the Client.

6. If the Client chooses to proceed to a Supported Assessment, the way the assessment will be carried out and what clinical records are required should be discussed with the Client and documented in the Early Planning Report.

7. Any Support Services required should be outlined in the Early Planning report, for example Family and Whānau sessions, Cultural Advice, Active Liaison, Social Work or the collection of notes and records relevant for the Supported Assessment.

8. The Personal Wellbeing Index (PWI) must be completed during the Early Planning sessions and the results included in the Early Planning Report.

9. Where the Client chooses to proceed to Supported Assessment, the Provider should request a signed ACC6300 ‘Authority to collect medical and other records’ on ACC’s behalf.

10. If the Client is proceeding to a Supported Assessment, ACC will contact them directly to discuss the collection of notes.

11. Where the Client is choosing to progress with Supported Assessment, but has a held claim, the Provider should ask the Client or the guardian to complete the ‘Cover time frame extension’ part of the Early Planning Client or Guardian Confirmation forms.

12. Unused hours do not roll over into the next recovery stage.

Next Stage

Depending on the Client’s needs, eligibility and preference:

1. Clients with a new claim who are deemed to meet ACC eligibility criteria for consideration of cover may consider:
   - Supported Assessment
   - Support to Wellbeing (short term)

2. Clients with a new claim who are not considered to meet ACC eligibility criteria may consider:
3. Clients with a previously covered (accepted) claim can move on to the following services:
   - Supported Assessment (as required to identify treatment needs)
   - Support to Wellbeing
   - Maintaining Wellbeing

4. Clients with a claim that has been previously declined by ACC because the Client chose not to progress can consider:
   - Supported Assessment

5. If the Client has a claim that has been previously declined by ACC due to criteria not being met, the Provider should discuss this with ACC as soon as possible.

The services above are described in the relevant sections of these guidelines. If there is any doubt about what options are available to the Client, please contact ACC.

| SPECIAL NOTE ABOUT THIS SERVICE | It would not be appropriate for this service to be delivered by a psychiatrist as psychiatric services are reserved for Clients who have a diagnosis and specifically require psychiatric input. |
been provided. However, the Client may choose to return for a Supported Assessment at a later stage.
## Supported Assessment

<table>
<thead>
<tr>
<th><strong>Service Name</strong></th>
<th><strong>Supported Assessment</strong></th>
</tr>
</thead>
</table>
| **Who is this service for?** | • New Clients who are likely to need treatment that exceeds eight hours or returning Clients who do not already have a covered mental injury.  
• Returning Clients who would like to access, and are eligible for, further support but have a declined a claim as the result of not progressing to assessment previously.  
• Returning Clients who have a covered mental injury but are presenting with new symptoms where a re-assessment is clinically indicated.  
• Clients who would like to be assessed for Lump Sum or Independence Allowance compensation by ACC but do not yet have a diagnosed mental injury.  
• Clients who are struggling to perform their normal work or commence work (in the case of a young person) and who ACC has indicated would be eligible for Weekly Compensation. (The Provider should contact ACC to discuss eligibility requirements). |
| **Who performs this service?** | It may be delivered by either:  
• Two Providers; a qualified ACC assessor and the Client’s Lead Provider, working collaboratively to support the Client through a process of assessment (this may be an independent assessor where ACC requests this).  
• By the Client’s Lead Provider, if they are also an approved ACC assessor. This is the preferred option if appropriate for the Client and requires clear clinical rationale if the Lead Provider is qualified to complete the assessment but requests not to do so.  
(See Assessment Types below) |
| **Incoming information** | • Relevant clinical records (see section on relevant clinical records).  
• Relevant school/ Oranga Tamariki reports (for children and adolescents).  
• A request for assessment from ACC that is particular to the Client’s situation. |
<table>
<thead>

<tr>
<td></td>
<td>The ACC6424 Supported Assessment: Child and Adolescent and supporting clinical records.</td>
</tr>
</tbody>
</table>

| Service delivery | 1. During Supported Assessment, Providers must ensure that Clients are appropriately supported, particularly where the assessment is carried out by an independent assessor (Assessment Provider). The type of support may include; attendance by the Lead Provider, Family and Whānau support, Social Work, Cultural Advice or Active Liaison as appropriate. The Lead Provider must also provide the Assessment Provider with all the relevant background information. |
|                 | 2. Where a single Provider carries out this service the maximum number of face-to-face hours is 10 (using service code SCSA). These may be used as follows: |
|                 |   o Up to two hours pre-assessment sessions, whilst waiting for any required clinical records to be obtained, for the Client to be informed about and prepared for the assessment. |
|                 |   o Up to five hours supported assessment sessions. |
|                 |   o One hour Client assessment report review session. |
|                 |   o Up to two hours post-review support sessions while awaiting ACC’s decision. |
|                 | 3. Where this service is provided by the Lead Provider and an Assessment Provider working collaboratively, the following maximum sessions apply: |
|                 |   o The Lead Provider can use up to 10 hours as per section 2 above (using service code SCSAL). |
|                 |   o The Assessment Provider can use a maximum of six hours (using service code SCSA). This is comprised of up to five hours of face-to-face assessment time and up to one hour to review the assessment report with the Client. |
|                 | 4. The assessment review appointment will include the Client and any others thought to be necessary unless there are |
concerns around Client or Provider safety, or if this is deemed clinically inappropriate.

<table>

When to use a psychiatrist

Psychiatrist involvement would typically be decided within the Early Planning service as part of preparation for the Supported Assessment Service (or as early as possible). The Lead Provider should take the following factors into consideration when determining the need for a psychiatrist:

- Where the Client requires an Incapacity Assessment as they may be unfit for work due to their mental injury (to access entitlements, such as Weekly Compensation or Loss of Potential Earnings (LOPE)). Please note, if a psychiatrist is not available to do the assessment within four weeks a clinical psychologist can complete the Incapacity Assessment.
- Recent discharge from a Psychiatric Inpatient Unit.
- History of serious mental health disorders such as bipolar affective disorder or schizophrenia.
- Co-morbid physical health issues that may be influencing mental state, such as:
  - poorly controlled diabetes,
  - HIV,
  - severe traumatic brain injury, or
  - evidence of gynaecological and/or hormonal conditions that may be causing mood instability.
- If Early Planning or obtained clinical records indicate the Client will benefit from a review of medication at the same time as the assessment. Indications of this include poly-pharmacy indicated in GP notes, as some medications and/or prescribing regimes can produce symptoms that mimic other mental health problems.
- In cases where pharmacotherapy is likely to be complex, for example treating pain concurrently with mental disorder.

Note that a referral to a psychiatrist can be made at any time should the Lead Provider consider this is prudent. Review or follow-up by a psychiatrist following a Supported Assessment may be indicated where:

- Previous indicators for involvement were identified at Supported Assessment, and/or where the cover assessment identified:
  - pharmacotherapy is likely to be complex (for example, treating pain concurrently with mental disorder)
  - complex diagnostic issues which require clarification
  - serious or long-standing alcohol and drug use issues

If the ISSC Supplier doesn’t have a psychiatrist as part of their ISSC Service and a psychiatrist is needed, the Supplier has two options:
• Establish a relationship with psychiatrists within the TA that you provide services in who hold the CLPS (Clinical Psychiatric Services) contract and directly refer to them. The Supplier needs to contact ACC to discuss which psychiatrist will be used. This enables ACC to generate two purchase orders, of which one allows the psychiatrist to invoice ACC directly for their part in the Supported Assessment.

• Where a Supplier does not have a network established, the Supplier can contact ACC directly to request names of suitable psychiatrists. The Supplier will contact the psychiatrist and follow the process as above.

Support to Wellbeing

<table>
<thead>
<tr>
<th>Service Name</th>
<th>Support to Wellbeing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Objective of the service</td>
<td>The objective of this service is to provide the Client with a personalised treatment plan developed with the Client and informed by the Supported Assessment to achieve recovery from, or the self-management, of their covered mental injury.</td>
</tr>
<tr>
<td>Who is this service for?</td>
<td>Clients with a covered mental injury who require therapeutic intervention.</td>
</tr>
<tr>
<td>Who performs this service?</td>
<td>Support to Wellbeing may be delivered by a single Provider or as a multi-disciplinary approach. This could include multiple services and providers within ISSC as well as the Lead Provider coordinating services outside of the ISSC.</td>
</tr>
<tr>
<td>Incoming information</td>
<td>Clinical notes from previous Providers and information from the Supported Assessment (Supported Assessment Report and any related discussions).</td>
</tr>
<tr>
<td>Outgoing information</td>
<td>Wellbeing Plan</td>
</tr>
<tr>
<td></td>
<td>Wellbeing Progress Report</td>
</tr>
<tr>
<td></td>
<td>Completion Report</td>
</tr>
<tr>
<td>Process</td>
<td>1. ACC will confirm cover for a mental injury to the Provider and the Client and approve four hours for the completion of the Wellbeing Plan.</td>
</tr>
<tr>
<td></td>
<td>2. The Supported Assessment Reports and any related discussions.</td>
</tr>
</tbody>
</table>
discussions can provide input to the plan.

3. For returning Clients who have not recently been assessed, WHODAS 2.0 should be administered as part of the Wellbeing Plan development for a baseline WHODAS 2.0 score.

4. The Lead Provider will coordinate the development of the plan with input from the assessor and all Providers that have a role in forming the plan.

5. The Lead Provider will complete the documentation of the plan and submit it to ACC for approval.

6. ACC will check that the plan demonstrates appropriate goals and treatment plan for recovery or self-management for the covered mental injury.

7. ACC will approve the plan by issuing further purchase order for up to 44 hours of Support to Wellbeing for 12 months from the date of the last face to face in the Wellbeing Plan phase of the service and advise the Client.

8. ACC will continue to coordinate other entitlements as required to support the Client.

9. ACC will confirm with the Provider, the monitoring points (Case Conference and Progress Report) so these may be scheduled.

10. The Provider will deliver therapy as per the Wellbeing Plan, informing ACC of any significant changes.

11. For plans longer than six months, a Progress Report will be required at the halfway stage and a Case Conference at the ¼ and ¾ stages. Alternative arrangements may be requested by ACC.

12. For plans for up to six months, a Case Conference will be required before the Completion Report is prepared, or as requested by ACC.

13. The Wellbeing Plan should be updated to reflect any significant changes in the Client’s goals or circumstances. ACC will approve up to 30 minutes for this.

14. At any time during Support to Wellbeing either the Provider or ACC may determine that it is clinically appropriate for an updated assessment to be undertaken. The Provider may signal this need in
the Progress Report.

15. Where the Client has successfully achieved recovery or self-management the Completion Report should be completed and submitted to ACC.

16. The WHODAS 2.0 and PWI will be re-administered at the completion of service. If necessary, the Provider may re-engage with the Provider who administered the baseline WHODAS 2.0 to do this.

17. ACC will use the completion report to confirm the Client’s personal goals for the service have been achieved.

18. ACC will also contact the Client to confirm that they have all they need for now.

19. Where the Client’s needs have been met, ACC will advise the Client that Maintaining Wellbeing sessions are available.

20. ACC will issue a purchase order for the first year of Maintaining Wellbeing and then ‘close the claim’.

<td>1. This service item provides for up to four hours of face-to-face sessions per year for three years commencing from the completion of therapy (i.e. completion of Support to Wellbeing service, submission of Completion Report and Client transition to self-management).</td>
</tr>
<tr>
<td></td>
<td>2. This service item must be approved by ACC.</td>
</tr>
</tbody>
</table>
3. This service item is only available to Clients with accepted claims who have completed the Support to Wellbeing service.

4. Unused hours do not roll over into the next year and a DNA cannot be invoiced if a Client does not attend a session.

5. Where a Client presents for Maintaining Wellbeing with service needs outside of the scope of this service item the Provider must:
   - Advise ACC of this escalation as soon as practicable, but no later than the completion of the final approved Maintaining Wellbeing session.
   - Complete an engagement form (Getting Started). See section: Returning Clients
Support Services

Support services can be provided as part of a Client’s primary ISSC services following Early Planning, where specific needs are identified and able to be met through the delivery of these services. These include:

- Family and Whānau Support
- Social Work
- Cultural Advice
- Active Liaison

These services require prior approval from ACC before delivery. All requests for should be accompanied by appropriate rationale. Rationale should include the outcome that will be achieved by using the support service and how many hours are being requested. ACC will issue a purchase order once these services are approved.

The Supplier would usually apply for these services through:

- Early Planning, Supported Assessment, and Support to Wellbeing plans and progress reports.
- Case Conferencing.
- Contacting ACC by email.

The Lead Provider will document the progress and outcome of support services in relevant reports.

Family and Whānau Support

Family and Whānau Support is used to support a Client’s recovery through provision of early education and support to family and whānau about the effects of sexual abuse. Family and whānau can include:

- adults the Client is living with such as parents, spouses, partners, flatmates;
- siblings of the Client;
- other family members the Client spends significant time with;
- people emotionally important to the Client.

The support provided focuses on how family and whānau can support the rehabilitation goals of the Client. Services of up to 20 hours per Client can be requested. Family / Whanau support is intended to occur without the Client present, but the Client should be aware these sessions are occurring, with the Provider considering the age of the Client.
Family / Whānau support may include but is not limited to:

- education about the effects of sexual abuse,
- strategies to deal with behavioural or emotional issues of the Client and/or support, and
- coping strategies to ensure the stability of the home environment.

There are situations where this service is not appropriate. This could include where a court case is pending and some of the family or whānau may be used as witnesses, or when family conflict or abuse means the service would not be beneficial or could potentially even be dangerous. It is important that you consider a Client’s situation and safety when deciding whether to use this service.

Services which are excluded and not funded:

- Treatment of parental and family and whānau issues not directly related to the Client’s recovery.
- Relationship Counselling
- Resource Teachers; Learning and Behaviour (RTLBs) or special education assisting with issues related to school. However, ACC may be able to help with accessing these agencies.
- Reimbursement of costs of attendance, although some assistance with travel costs in special circumstances may be available as per ACC policy.
- Treatment of family and whānau members wishing to deal with their own sexual abuse. A separate claim will need to be lodged for this.

Family and whānau Support may either be delivered by the Lead Provider or a separate Provider depending on the circumstances.

Where possible, requests for Family and Whānau Support should be made as part of the request for a Primary Service item and be for the number of hours required for the duration of that service. Progress should be reported in the relevant Client reports although personal details of specific members of the family/whānau should NOT be included.

**Social Work**

This service is for when the Client may need support outside of primary services to support their recovery and rehabilitation. The focus of this service is on managing and/or removing any social barriers that prevent or compromise a Client’s ability to engage in ISSC treatment or Supported Assessment Services. It may be used to:

- Advise Clients and link them into other services that are available.
- Assist Clients to access other services.
- Introduce the Client to other services and ensure effective engagement.
The social worker will plan and facilitate this service. Only social workers who are a named provider under an ISSC contract can provide social work services. They do not have to be with the same ISSC Supplier as the Lead Provider.

Examples of where Social Work may be appropriate are:

- When Clients are not entitled to weekly compensation and need support connecting from MSD
- When Clients are being released from prison and need to connect with their community
- Where Clients need support connecting to community social services.

Service Requirements

1. Up to 10 hours of Social Work support may be requested for each Client. If there are circumstances where a Client requires more than the 10 hours, this should be discussed with ACC. ACC will determine whether Social Work should be provided via another ACC contract.

2. This service item must be pre-approved. Wherever possible, requests for Social Work should be made as part of the request for a Primary Service Item.

3. Requests for Social Work must include the rationale and goals for the service.

4. The Lead Provider will document delivery of this service item in the Client’s service records and record progress in the relevant ACC reports.

Cultural Advice

The provision of Cultural Advice acknowledges the cultural diversity of Aotearoa New Zealand and the importance of culture in the delivery of therapy and in the development of the therapeutic relationship between the Client and the Service Provider. Both can be better upheld through enhanced knowledge and respect for differing cultures, belief systems and social customs.

The Service Provider can request funding for Cultural Advice to engage with an appropriate person in their community who they determine to have the right level of stature and expertise to provide them with the necessary advice to deliver culturally responsive services to their Client. If the Service Provider identifies a need for Cultural Advice but is unable to locate an appropriate person to provide Cultural Advice in their community, they can contact ACC to assist with facilitating this.

Only Cultural Advice provided by an appropriate third party can be funded. The Service Provider cannot be funded to deliver Cultural Advice themselves.

Cultural Advice requires prior approval. The Service Provider must consult with ACC when determining the need for Cultural Advice and the appropriate third party to provide it. The Lead Provider will need to provide the following information to ACC:
• Relevant background information on the proposed provider of Cultural Advice, including why they are suitable to provide Cultural Advice.

• Rationale for requiring Cultural Advice, including details of the cultural barriers to be overcome and the treatment goals.

Service Requirements

1. The Provider will need to consult with the Client and obtain their agreement before seeking Cultural Advice. The Client’s agreement will also need to be obtained if it is determined that the Provider of Cultural Advice should attend the Client’s therapy sessions.

2. The Service Provider can request up to 10 hours of Cultural Advice per Client. The actual cost per hour incurred will be paid up to a maximum hourly rate as set out in the Service Schedule.

3. Where possible requests for Cultural Advice should be made as part of the request for a Primary Service item and be for the number of hours required for the duration of that service.

4. Progress should be reported in the relevant Client reports

Active Liaison

Active Liaison is used by the Provider to coordinate key activities that support the Client’s rehabilitation and recovery. This may include:

• Telephone discussions with Oranga Tamariki or a school to ensure that the necessary supports are in place at a Client’s home or school that supports the ISSC treatment programme.

• Connecting with the Client’s General Practitioner (where appropriate and this has been discussed first with the Client) to ensure they are on the same page and working together.

• Coordinating external agencies and/or family and whānau or caregivers to support the Client’s attendance at meetings.

• Leading and participating in cross sector inter-agency meetings, including recording and follow-up of actions.

• Helping the family and whānau with connecting with other agencies involved with the Client (with the Client’s permission) e.g. courts, NZ Police, Oranga Tamariki.

• Time spent with a provider who has been engaged to deliver Cultural Advice to the Lead Provider.
Service Requirements

1. This service requires pre-approval and up to 10 hours per Client can be requested. Active Liaison services will always be delivered by the Lead Provider.

2. Up to two hours of the 10 hours in total for Active Liaison time can be requested for the Lead Provider to liaise with a Supported Assessor to determine if there are any supported assessment needs for a Client e.g. may be a discussion with the Assessor to determine if assessment is the right path for the Client at this stage. Where this is required, the ISSC Lead Provider should complete and submit the Early Planning report which identifies that Active Liaison hours have been used during the Early Planning stage. This will then activate the requirement for ACC to create and send you a related purchase order referral for Active Liaison.

3. Where possible, requests for Active Liaison should be made as part of the request for a Primary Service item and be for the number of hours required for the duration of that service.

4. The Lead Provider should update ACC on how the Active Liaison time has been used in progress reporting and case conferences

Active Liaison hours are NOT for:

- The Lead Provider to liaise with other service providers when they are both with the same ISSC Supplier – except for the two hours available to determine the need for Supported Assessment (see point 2 above).

- The Lead Provider to attend court with the Client. In this circumstance, Active Liaison should be requested for the Lead Provider to liaise with and connect the Client to the Court Victims Advisor.

- Advocating for the Client.

- Active Liaison cannot be requested for time spent engaging with ACC.
Secondary Services

Group-Based Therapy

This service is focused on helping Clients to develop the specific skills which are the focus of that group. For example, an anger management group will focus specifically on the development of anger management skills. Clients would only be included in a group if they required the specific skills being addressed by that group.

Group Based Therapy is planned and delivered as part of Support to Wellbeing and is only available for Clients with an accepted claim. Group Based Therapy needs to be locally accessible to the Client.

- The type and nature of Group Based Therapy proposed for the Client should be documented in the Client’s Wellbeing Plan.
- The service must be delivered by two Service Providers approved by ACC who are required to keep the Lead Provider updated. The Lead Provider is responsible for documenting progress and achievement of outcomes in the reporting associated with the Support to Wellbeing service.
- Further requests for Group Based Therapy can be made by submitting an updated Support to Wellbeing Plan to ACC. Upon approval, the Supplier will receive a purchase order from ACC confirming what has been agreed.

Establishing endorsement to run a specific group.

Providers wanting to start a therapy group for ISSC Clients should follow the process below:

- Supplier submits a group proposal to their Engagement and Performance Manager,
- Group proposal is evaluated by ACC’s clinical team,
- Approval or feedback is sent to the Supplier by the Engagement and Performance Manager or the clinical team.

This process will take two to four weeks depending on the level of detail in the proposal and availability of clinical staff to evaluate.

The following information should be included in the proposal:

- Objectives and rationale for the group, including an outline of the content and focus,
- Names of the facilitators,
- Group duration – specific dates,
- Measure for ensuring Client safety,
- An outline of how outcomes will be evaluated.

Service Requirements

1. This service item can be delivered up to two hours per week and must be completed within a maximum of 16 weeks.
2. This service item must be pre-approved following a recommendation for Group Based Therapy in the Client’s Wellbeing Plan.

3. Clients may participate in more than one group service if the different groups focus on different skills as identified in their Wellbeing Plan and approved by ACC.

4. Group Based Therapy Providers must advertise any group-based therapy they are going to deliver to all ISSC Suppliers in their TA.

5. Groups must have a minimum of four ACC Clients and will contain no more than 10 participants.

6. There is no set reporting required for Group Based Therapy. The Group Based Service Providers will provide reports/debriefs to the Lead Provider from time to time as agreed. The Lead Provider is responsible for documenting progress in their service records and reporting.

7. Where a Client actively disengages during Group Based Therapy, the Group Based Service Provider will notify the Lead Provider as soon as practicable. There is no requirement for this “gap” to be replaced with another Client to meet the minimum requirement of four ACC Clients. Where a Client does not wish to proceed with the Group, then the Lead Provider will notify ACC to close off the purchase order for that service item. Where the Client has actively disengaged completely from all services, the Lead Provider will submit a Closure Notice.

**Group-Based Therapy – Dialectical Behaviour Therapy (DBT)**

This is a specific form of therapy designed primarily (but not exclusively) for Clients with Borderline Personality Disorder, or for Clients who have similar traits in terms of being prone to significant mood swings, over-reacting to life circumstances, and poor problem-solving.

The programme is long term and structured and is delivered by two approved Service Providers with specific training in DBT. A Client may participate in more than one form of Group-Based Therapy programme such as an anxiety management group and a resilience group and DBT.

- The type and nature of Group Based Therapy (DBT) proposed for the Client should be documented in the Client’s Wellbeing Plan.
- The two approved Service Providers are required to keep the Lead Provider updated. The Lead Provider is responsible for documenting progress and achievement of outcomes in the reporting associated with the Support to Wellbeing service.
- Further requests for Group Based Therapy (DBT) can be made by submitting an updated Support to Wellbeing Plan to ACC. Upon approval, the Supplier will receive a purchase order from ACC confirming what has been agreed.
Service Requirements

This service item must be delivered within a maximum of two hours per week over a 12-month period.

1. This service item must be delivered by two Approved ACC Service Providers approved to provide this service

2. This service item must be pre-approved following the recommendation for Group Based Therapy (DBT) in the Client’s Wellbeing Plan.

3. Clients may participate in more than one group service if the different groups focus on different skills as identified in their Wellbeing Plan and are approved by ACC.

4. Group Based Therapy (DBT) Providers must advertise to all ISSC Suppliers in their TA any group-based treatment they are going to deliver.

5. Groups can commence with a minimum of four ACC Clients and will contain no more than 10 participants

6. There is no set reporting required for Group Based Therapy. The Group Based Service Providers will provide reports/debriefs to the Lead Provider from time to time as agreed. The Lead Provider is responsible for documenting progress in their service records and reporting.

7. Where a Client actively disengages partway through Group Based Therapy (DBT), the Group Based Therapy Service Provider will notify the Lead Provider as soon as practicable. Where this indicates the Client does not wish to proceed with the Group, then the Lead Provider will notify ACC to close off the purchase order for that service item. Where this indicates that the Client has completely actively disengaged from all services, the Lead Provider will submit a Closure Notice.

ACC Continuity Sessions

There may be situations where we are not able to make a decision within the agreed timeframes. To ensure therapy continues without interruption a conversation needs to be had with ACC and the Supplier to discuss the expected time frame for decision making and agree the number of continuity sessions required. It is important that this happens well before the 10 hours approved for Supported Assessment expires.

If there are unanticipated delays that ACC is not aware of, it is important that the Supplier contacts ACC to inform of the delays.

Incapacity Assessment

This is usually part of a Supported Assessment where the Provider is requested to assess the impact of the mental injury on the Client’s capacity to work in their pre-injury
role or to commence work in roles deemed suitable by reason of experience, education or training, or any combination of these.

The assessment should be completed by a psychiatrist or where a psychiatrist is not available within four weeks of the referral, it may be completed by another appropriately qualified assessor. Please contact ACC to discuss further.

**Treatment Review**

<table>
<thead>
<tr>
<th>Service Name</th>

### Service delivery

1. This service is initiated by ACC and the service item must be pre-approved.

2. This service will inform ACC about the Client's current diagnosis, how a Client is progressing in therapy, evaluate the extent to which the current intervention is likely to be effective for the Client given their unique presentation, and current issues and circumstances, and provide recommendations for ongoing treatment if any further treatment is required.

3. The service item is for up to a maximum of 16 hours, including but not limited to face-to-face sessions with the Client, review of all relevant documentation, liaising with the lead provider about current treatment, writing the report, and provision of feedback to the Client and/or their treatment provider.

4. The Service Provider will administer the WHODAS 2.0 as part of this review and will report this data as part of the Treatment Review report.

5. The Treatment Review report and any other supporting documents will be submitted to ACC in a timely manner following provision of feedback to the client and/or their lead provider.

### Process

1. ACC will refer into this service following indications from a Psychology Advisor, that a treatment review is considered necessary.

2. ACC will contact the Lead Provider to advise of the referral and discuss whether ACC or the Lead Provider are better suited to discuss the Treatment Review with the Client.

3. The Assessment Provider will work closely with the Lead Provider to complete the Treatment Review and make decisions around what face-to-face sessions with the Client are required and whether the Lead Provider should be present at these sessions.

4. The relevant background information required for the Treatment Review Report can be taken from previous reports and case notes and doesn’t need to be discussed with the Client again.

5. Section 4 of the Treatment Review Report form regarding the
Assessments under other ACC contracts

Assessments for other mental injuries

There are comprehensive assessment services available under our Psychological Services contract for Clients, who may have suffered a mental injury caused by physical injury or a treatment injury or might have a work-related mental injury.

Assessments are completed by Psychologists, who have been approved by ACC to provide these services.

ACC should be contacted for advice on how to refer a Client for a neuropsychological assessment.

Neuropsychological/ Cognitive testing

A neuropsychological assessment evaluates the Client’s cognitive functioning, where a Client is suspected to have cognitive deficits which are interfering with their recovery.

A neuropsychological assessment may also be required where a Client has a history of a traumatic brain injury and it is felt that a more complete assessment of the Client’s functioning is indicated. This can also help establish how and in what ways the treatment plan can cater specifically for the Client’s needs.

Alternatively, a cognitive assessment may be conducted by a psychologist competent in psychometric assessment as part of the Supported Assessment. This may be applicable to children who have suspected cognitive deficits/developmental disabilities which may have an influence on the way therapy is delivered. While these assessors may not be specialised in neuropsychological assessments, they have the required expertise and familiarity with the psychometric tools to use the appropriate measures to determine a Client's cognitive functioning. It is possible that a full neuropsychological assessment may be requested following a cognitive assessment.

ACC should be contacted for advice on how to refer a Client for a neuropsychological assessment.

Specialty Assessors

Where special assessments are required that are not available within the ISSC contract or the Client’s normal Supplier agency, these can be brought in. The Lead Provider will
still need to work collaboratively to support the Client through the process of assessment.

For example, if the Provider identifies that psychiatric assessment is necessary but the Client’s Supplier has no named psychiatrist on their contract, ACC, the Lead Provider, and the Client will agree on an appropriate assessor. ACC will raise an additional purchase order to pay for that assessor. The Treatment Provider will then work with the psychiatrist to determine how the assessment will be carried out to best suit the Client’s needs.
Supporting service delivery for the Client

This section encompasses:

1. Engagement Form
2. Case Conferencing
3. Client reporting and monitoring requirements
4. Outcome measures
5. Obtaining clinical and other records
6. Other ACC entitlements
7. Managing non-attendance
8. Clients leaving the service
9. Notifying ACC of Closure
10. Transitioning Clients
Engagement Form

Providers under ISSC contracts are required to lodge Client claims using the Engagement Form. This form is only submitted electronically and requires Providers to have a RealMe login and Internet access. This form is not required where ACC has referred the Client to you.

RealMe Login

ACC plans to deliver all future ACC online services on the MyACC site using the RealMe login service. RealMe is a service co-created by the Department of Internal Affairs and NZ Post which enables external users to use one sign-on to access all ACC online services as well as other government websites.

All ISSC Approved Providers will need to provide us with their individual email address (this needs to be provided to ACC using the ACC24 or ACC6244). We’ll use this email address to send an invitation to access MyACC so that a Provider can use the engagement form. If a Provider does not already have a RealMe login, (some people might already have one, if for example they have recently requested a passport online), they will be guided to create a RealMe login and then be directed to the Engagement Form on MyACC.

We recommend that Providers complete the RealMe sign-up process prior to having a session with a Client so they can complete Engagement Forms without delay and as needed during Client sessions.

Technical requirements

ACC recommends the Engagement Form and MyACC site will best be viewed using the following operating systems and browsers:

<table>

</tr>
</tbody>
</table>
### Printing the form

Once the Provider has submitted the form, a confirmation number - the equivalent of an ACC45 number - is assigned to the form. A PDF of the form is generated, and copies can be printed for the Provider’s records and to be given to the Client.

### Case conferencing

To reduce the amount of time Providers spend report writing, ACC has introduced case conferencing as a means of updating ACC on progress against the Wellbeing Plan.

The intention is that the Provider, the Client, and ACC collectively discuss progress and the Client’s on-going needs. Other parties, for instance GP, Social Worker, Oranga Tamariki case coordinator, may attend the case conference as appropriate.

Providers should indicate tentative case conference dates in the Wellbeing Plan. ACC will then contact the Provider three weeks prior to this date to confirm a date and time for the case conference. This can normally be incorporated into the scheduled face-to-face session. The agenda of the case conference may be agreed between the Provider and ACC at that time.

If the Provider has concerns about the Client participating in the case conference, they can talk to ACC about this. ACC may request that case conferencing is replaced with a written progress report in this circumstance.

Any adjustments to the Wellbeing Plan that are discussed as part of the case conference will be reflected in an updated purchase order to the Supplier after the case conference.
Client reporting and monitoring requirements

All Client reports are word documents that can be downloaded from the ACC webpage. Please note that ACC will not accept reports that are handwritten or submitted on the incorrect templates. Once completed, please send reports to sensitiveclaimsproviderreports@acc.co.nz.

Providers must send ACC their Client reports in a timely manner so that we can make a decision on the claim quickly. These progress monitoring dates should be based upon expected Client milestones detailed within the Client’s Wellbeing Plan.

The Provider is required to keep to these time frames to ensure the Client experiences a seamless service. Progress monitoring may include the completion of a written progress report or be completed as a case conference with the Client and ACC.

Client reports that do not meet our quality standards will be returned to the Supplier for resubmission. We will provide information to the Supplier as to what aspects of the report we need them to address or provide more clarity on. When completing these reports, the Providers should ensure:

- They are written in plain language.
- They are written, where possible, in a way that non-clinical staff can understand and use to make decisions.
- All required fields are completed.
- Information reflects the Client’s current situation and demonstrates planning with the Client.
- Answers to questions are succinct.
- The Provider’s name is entered in the signature field in lieu of a signature and the report is dated. This also applies to electronic signatures.
- The date of the last face to face session with the Client is included.
- Any evidence required to support clinical opinions is included or appended (e.g. relevant clinical records).

All forms and reports should be completed in partnership with the Client. The Client needs to be given the opportunity to review completed reports if it is appropriate.
The table below provides a summary of forms and reports:

<table>

Maintaining Wellbeing until the Completion Report (Long Term) has been submitted to ACC. ACC will then issue a purchase order for Maintaining Wellbeing.

- Support to Wellbeing (Short Term) Completion Report plus PWI scoring.

Please note: There are no reporting requirements for Maintaining Wellbeing.

**Outcome measures**

The Personal Wellbeing Index (PWI) and World Health Organisation Disability Assessment Schedule (WHODAS 2.0) are subjective disability and quality of life measures which we have incorporated into the assessment, planning and progress reporting services of the ISSC service.

These outcomes measures are not used to measure the performance of individual Providers or the progress of the Client, but are in place so that we can measure the overall effectiveness of the service that is being provided.

The PWI is completed as part of Early Planning and again within Support to Wellbeing Services. The WHODAS 2.0 is used as part of the Supported Assessment and again when the Client nears completion of the Support for Wellbeing service.

Both the PWI and WHODAS 2.0 results have been integrated into the report required within the service stage.

A summary of these measures is below:

**Personal Wellbeing Index (PWI)**

This quality of life outcome measure assesses subjective wellbeing. The PWI Scale contains seven items of satisfaction (seven questions), each corresponding to the following domains:

- Spirituality/Religion
- Standard of living
- Personal health
- Achieving in life
- Personal relationships
• Personal safety
• Community connectedness; and
• Future security

There is also a global question which asks about Client satisfaction with life as a whole. This is not used in the scoring, but it adds useful clinical information. Parallel forms of the PWI have been created to be used with population sub-groups. The parallel forms are:

• PWI-A   Designed for use with the general adult population, aged at least 18 years
• PWI-SC  Designed for use with school-age children and adolescents
• PWI-ID  Designed for use with people who have an intellectual disability or other form of cognitive impairment.

The scale can be administered in either a verbal or written format and is completed by the Clients themselves. Little training is required to use the scale because it is easy to administer, score and interpret. A zero (no satisfaction at all) to 10 (complete satisfaction) defined response scale is employed. The completing clinician should read the manual carefully.

Manuals for PWI’s can be located at the following website:

Tips related to completing PWI:

• Read the administration instructions.
• Check to ensure that responses are varied and not all the same (response set). Consistently maximum or minimum scores should be eliminated as lack of variation will distort data analysis.
• For each domain score convert the score out of 10 to one out of 100, e.g. 7 becomes 70% or 6.5 becomes 65%. To obtain the Personal Well Being Index add the percentages for the seven items that comprise this (Standard of living, Personal health, Achieving in life, Personal relationships, Personal safety, Community Connectedness, and Future Security). This should give you a number between 0-700. Divide this number by 7 and you will have the Personal Wellbeing index score.

- Qualitative Data: Report any difficulties or concerns/observations made during the completion of this measure.

**PWI – A**

This measure is to be used as part of the Adult Early Planning. Of note:

- The test is self-completed either in written or verbal (interview format) as described.
- The Likert scales are marked by the Client (18 years or over) indicating scores of 0 to 10 (No satisfaction at all through to completely satisfied).

**PWI- ID**

This is only for Clients who have an intellectual disability or other form of cognitive impairment. Of note:
• The administration of this scale needs to be restricted to psychologists who are experienced in the administration of psychometric instruments.

• Others must not answer “on behalf” of anyone but only the Client themselves as the former will render the results invalid.

• The PWI-ID differs from other tests in that it incorporates a very detailed “pre-testing” protocol to determine whether, and to what level of complexity, the person can use the scale.

• Attention to the testing environment is needed. While the manual says the caregiver must not be present, ACC considers that it is appropriate for a Client to have the person of their choice in the room.

• The Likert scales are marked by the Client indicating scores of 0 to 1 (2-point scale), 0 to 2 (3-point scale) or 0 to 4 (5-point scale).

**PWI- SC**

This is for school-age children and adolescents. (Note the PWI-PS (Pre-school) will not be used). Note that the Likert scales are marked by the young person indicating scores of 0 to 10 (Very Sad through to Very Happy).

WHO Disability Assessment Schedule 2.0 (WHODAS 2.0)

This measure was developed by the World Health Organisation as a generic instrument for assessing disability in everyday functioning. It takes approximately 20 minutes to administer the 36-item simple version. Forms can be downloaded from the World Health Organisation web site: [http://www.who.int/classifications/icf/whodasii/en/](http://www.who.int/classifications/icf/whodasii/en/) along with the manual. It is important that the completing clinician has read the manual carefully.

There are several different forms of this test. We require the Client to complete the 36-question simple version at the Supported Assessment and at the conclusion of treatment. The 12-item version can be used to monitor progress during treatment. There is a:

• Self-administered form for adults over 18 years.

• A fully structured interview administered form for people with literacy issues.

• Proxy version for friends, relatives or carers.

The WHODAS 2.0 measures six domains across a 5-part Likert scale ranging from “None” to “Extreme or cannot do” **over the previous 30 days**. Ratings need to be averaged over the 30-day period:

• **Cognition**: understanding and communicating

• **Mobility**: moving and getting around

• **Self-care**: hygiene, dressing, eating and staying alone
- **Getting along**: interacting with other people
- **Life activities**: domestic responsibilities, leisure, work and school
- **Participation**: joining in community activities

There are two forms of scoring, complex or simple.

Use the 36-item simple scoring method:

1. The scores assigned to each item should be selected from “none” (0), “mild” (1), “moderate” (2), “severe” (3) and “extreme” (4). Please note that the WHODAS manual lists the scoring as (1) to (5). However, to better reflect a “none” rating where there are no limitations to functioning in a particular area we ask that you apply the scoring (0) to (4) accordingly.

2. Sum the score for the items in a domain and then divide by the number of items in that domain. Some domains have four, five, six or eight items, so ensure that you are dividing by the correct number of items to reach the average for a particular domain.

For an example see the table below:

<table>
<thead>
<tr>
<th>Domain</th>
<th>Number of items</th>
<th>Add the scores for each item</th>
<th>Divide by the number of items for that domain and round to the nearest decimal place</th>
</tr>
</thead>
<tbody>
<tr>
<td>Understanding and Communicating</td>
<td>6</td>
<td>1+1+2+2+1+3=10 Minimum score possible=0, maximum score possible =24)</td>
<td>10/6=1.666=1.7</td>
</tr>
<tr>
<td>Getting around</td>
<td>5</td>
<td>4+4+4+4+3=19 Minimum score possible=0, maximum score possible =20)</td>
<td>19/5=3.8</td>
</tr>
<tr>
<td>Self care</td>
<td>4</td>
<td>4+4+3+3=14Minimum score possible=0, maximum score possible =16)</td>
<td>14/4=3.5</td>
</tr>
<tr>

<td>maximum score possible =20)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>--------------------------------</td>
<td>-----------------------------</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Life activities-household</td>
<td>4</td>
<td>2+2+2+2=8</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Minimum score possible=0, maximum score possible =16)</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>8/4=2</td>
<td></td>
</tr>
<tr>
<td>Life activities-work/school</td>
<td>4</td>
<td>3+3+3+4=13</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Minimum score possible=0, maximum score possible =16)</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>13/43.25=3.3</td>
<td></td>
</tr>
<tr>
<td>Participation in Society</td>
<td>8</td>
<td>1+2+3+4+3+2+1+4=20</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Minimum score possible=0, maximum score possible =32)</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>20/8=2.5</td>
<td></td>
</tr>
</tbody>
</table>

Use the “36-item Instrument Scoring Sheet, Simple Scoring Calculation” live scoring template on the WHODAS website (http://www.who.int/classifications/icf/whodasii/en/) or on the ACC website which generates a Total Disability Score (Overall score) as a percentage in the purple strip as you add the item ratings into the template. You will see it recalculating as you add more items in.

Qualitative Data: Report any difficulties or concerns/observations made during the completion of this measure.

Obtaining clinical and other records

Where a Provider requires records such as clinical records from another party they should request ACC, in the Early Planning Report, to obtain the records for them.

An ACC6300 ‘Authority to Collect Medical and Other Records’ form will need to be completed and signed by the Client and returned to ACC (see "Authority to Collect Client Information").

- Ensure the Client or their legal representative is aware that records are being requested and why.
- There needs to be a clear rationale for requiring the information and the process followed needs to be consistent with the Privacy Act 1993 and Health Information Privacy Code 1994.
Examples, where records may be required, are shown in the table below:

<table>
<thead>
<tr>
<th>Record type</th>
<th>Reason for obtaining</th>
</tr>
</thead>
<tbody>
<tr>
<td>DHB Mental Health records</td>
<td>The Client was recently discharged and a copy of the discharge summary would help the Provider to inform their clinical decision making, to help manage risks identified at discharge. There are previous assessment reports associated with the Client’s mental health history that will assist a current assessor to understand the Client’s presenting symptoms and previous treatment.</td>
</tr>
<tr>
<td>DHB Clinical Records</td>
<td>The Client received care in the Emergency Department and a copy of the Emergency Department record would help the Provider in obtaining further information about the injuries sustained and history taken by clinical staff about the event.</td>
</tr>
<tr>
<td>GP notes</td>
<td>The Client has been regularly attending the GP with symptoms of depression that may be related to the sexual abuse even if the GP has not known about the sexual abuse. The Provider wants to review the treatment plan commenced by the GP as this will have a bearing on the Client’s clinical management within the ISSC Service.</td>
</tr>
<tr>
<td>Child’s school records</td>
<td>The Client has had behavioural issues since being sexually abused. The parents have told the Provider this has been well documented by the school, which has tried several strategies to manage the behaviour. The Provider wants to review the behavioural plan as this will provide valuable information relevant to any new strategies which may be tried. If there is a requirement for ACC to consider funding for educational support, it is recommended that the Provider contacts ACC.</td>
</tr>
<tr>
<td>Oranga Tamariki records</td>
<td>Oranga Tamariki has had a long involvement with a Client and their family. There is a current social worker involved and the Provider has spoken with the social worker. The social worker suggested requesting the records as there is such a long history with information relevant to the Provider to help them to determine how they would proceed.</td>
</tr>
<tr>
<td>Another therapist's</td>
<td>The Client has switched Suppliers and/or Providers part way through the Support to Wellbeing service. The new Provider has re-entered the Client into ISSC with a Getting Started session and holds a copy</td>
</tr>
</tbody>
</table>
of reports submitted to ACC by the prior Supplier. However, the Provider feels it would be beneficial to review the clinical records made by the previous Provider, as this will provide detailed clinical information the Provider needs.

If a Client is applying for other ACC entitlements the Provider is required to liaise with ACC. This may affect the type of medical and other relevant information we need to determine whether a Client is eligible for the entitlement. Ensure that the correct information is gathered as early as possible to avoid any unnecessary delays in Clients receiving entitlements from ACC.

**Other ACC entitlements**

Under ACC legislation, Clients can be considered to receive entitlements if they have a “covered” claim (refer to definitions Appendix 2). Entitlements fall under broad categories such as Treatment, Social Rehabilitation and Vocational rehabilitation.

All ACC entitlements have specific eligibility criteria that Clients must meet to receive them. These criteria are documented within ACC legislation.

If the Client has or develops any specific needs that fall outside the scope of the ISSC, the Provider should speak to ACC to discuss whether the Client may be eligible for ACC help to address these needs. ACC will discuss any eligibility directly with the Client and can give general eligibility information to Providers where needed.

Providers should not discuss specific ACC entitlements directly with the Client. All entitlements are dependent on individual circumstances of the Client, so it is important that these conversations occur between ACC and the Client.

If the Client currently has an incapacity to perform employment activities, they may be eligible for financial assistance from ACC in the form of either Loss of Potential Earnings (LOPE) or Weekly Compensation (WC). We need to consider these applications quickly to ensure that these can be provided as soon as possible to eligible Clients. This may mean we have to collect information from sources other than the GP or other health providers. If we do, we will discuss it with the Client first.

Some Clients who experience a permanent loss of functioning may be eligible to receive Lump Sum compensation for a permanent impairment. This entitlement will require other assessments outside of the ISSC service and it is recommended that ACC is made aware as early as possible if a Client wishes to apply for this entitlement.

**Managing non-attendance**

Clients should be reminded that if they can’t attend an appointment for any reason they should let the Provider know at least 24 hours in advance, and that a new appointment can be easily scheduled.
Processes should be in place to help the Client to maintain their engagement in ISSC services. These may include:

- Text message or phone reminders for appointments.
- Appointment cards.
- Social worker involvement.
- Ensuring transport and childcare needs have been considered.
- Location or venue preferences for the Client should be considered.

Clients may occasionally miss an appointment without giving sufficient notice. In these instances, the Provider should consider the Client’s safety and take appropriate action if they are concerned.

In recognition of the partial loss of productive time when Clients miss appointments (i.e. they did not give at least 24 hours’ notice) you may claim for up to four non-attendance or DNA (Did Not Attend) fees per Client over a 12-month period. The approval of DNA’s is only available for the primary services.

In the case of a DNA, the Provider must contact ACC within one business day of the DNA to discuss why the Client didn’t attend and discuss an action plan to help ensure the Client remains engaged in the service.

When Clients change Suppliers part way through services, the new Supplier can obtain DNA information about the Client from ACC. This Supplier can use this to develop processes to potentially improve engagement with the Client.

Charging the Client for non-attendance

If you have in your terms of engagement a provision to charge the Client for non-attendance once the ACC covered DNA provision has been exhausted, the Supplier is able to charge the Client.

You should let the Client and their supporting representative or family/ whānau know both verbally and in writing at the start of the service about the possibility of being charged for non-attendance.

ACC expects you will not charge more than the agreed ACC fee and will take the Client’s financial situation into consideration.

**Clients leaving the service**

The term active disengagement is used to describe a range of situations where the Client has chosen to leave the service by withdrawing or no longer accessing services.

**Examples include:**
- The Client failing to attend an agreed appointment and not responding to repeated efforts to contact and reschedule.
- The Client not making any further appointments when part way through a service.
- The Client choosing not to contact the Supplier to make an appointment after referral to that Supplier and unsuccessful follow-ups by the Supplier to make an appointment.
- The Client contacting the Supplier or Service Provider stating they don’t want to continue at this time.

Active disengagement can happen at any time. Where a Client doesn't yet have cover for their claim, ACC typically declines claims for Clients who actively disengage during short-term services. This does not in any way restrict their ability to re-enter the ISSC service at a later date.

**Notifying ACC of closure**

Remaining in therapeutic services can be difficult for some Clients, and Clients may leave the service at any point. It is important that Clients know that they can leave and return at a later date if they wish, and that ACC is told when Clients leave the service. The provider can do this by either:

- Submitting an ACC6430 Closure Notice
- Sending an email to sensitiveclaimsproviderreports@acc.co.nz. The email should specify the following:
  - Clients name
  - Claim number
  - ACC team or name of ACC team member supporting the client
  - Date of last face to face session with the Client
  - Reason the Client disengaged
  - Any safety concerns that ACC needs to be aware of.

If the Provider holds sufficient information to partially complete a Service Report (e.g. Early Planning Report or Supported Assessment) they should provide this along with the closure notice.

Providers have four weeks from the last contact with the Client to get back in touch with the Client and re-engage them. If they can't contact the Client, they must send a Closure Notice to ACC. Providers should take appropriate action where they have concerns about the Client’s safety.
If we become aware that the Client has moved to another Supplier or has told the Lead Provider they no longer wish to receive services, ACC will let you know and ask for a Closure Notice along with any other partially completed reports.

**Transitioning Clients**

**Between Providers**

The Client should be involved when it is necessary to choose an alternative Provider (and/or Supplier). There needs to be a handover process or meeting between the two Providers to ensure a seamless process for the Client.

In the event of an unexpected departure of a Provider that results in discontinuity for a Client which the Supplier is not able to rectify, the Supplier needs to notify ACC as quickly as possible. ACC will work with the Supplier to implement the Supplier’s business continuity and transition plan.

**Between Suppliers**

There may be circumstances where a Lead Provider changes Suppliers, and transfers Clients with them. When this happens, the Supplier, who the Client was originally with, must agree to the transfer. In all circumstances, continuity of service provision for the Client should be paramount.

The Provider requesting the transfer must confirm that the following criteria are met:

- Each Client is fully informed and agrees to the change of ISSC Supplier
- Clients must not be transferred to another ISSC Supplier until the recovery stage they've engaged in has been completed (for example they cannot transfer midway through Support to Wellbeing – Short Term or Supported Assessment)
- ACC is contacted requesting the transfer, confirming that all requirements above have been met and advising the date when the transfer needs to occur

If a transfer is requested part way through Support to Wellbeing, consider the following:

- How far along each individual Client is in support to wellbeing (if they have just started, we will need to wait until a progress report is due)
- What the next natural transition point would be (e.g. progress report would be ideal, and then we can start up with new Supplier.)
- If you’re almost at the end of treatment (e.g. Completion Report), there is no requirement to transition the Client unless the Client is requesting Maintaining Wellbeing Services.
Service administration

This section encompasses:

1. Invoicing
2. Purchase orders
3. Making a prior approval request
4. Paying others
5. Changing Supplier/Provider details
6. Quarterly Supplier reporting
7. Troubleshooting
Invoicing

Our business relationship with you will be faster, easier and more efficient if invoicing is done electronically. The following table describes what you need to do:

<table>
<thead>
<tr>
<th>What to do</th>
<th>Website page: <a href="http://www.acc.co.nz">www.acc.co.nz</a></th>
</tr>
</thead>
<tbody>
<tr>
<td>How to work online with ACC</td>
<td>Home Page&gt;Health and Service Providers&gt;Getting set up online</td>
</tr>
<tr>
<td></td>
<td>Also on this page:</td>
</tr>
<tr>
<td></td>
<td>• Apply for a digital certificate</td>
</tr>
<tr>
<td></td>
<td>• FAQs for working online</td>
</tr>
<tr>
<td></td>
<td>• Where to get more information</td>
</tr>
<tr>
<td>How to set up electronic invoicing</td>
<td>Home Page&gt;Health and Service Providers&gt;Invoicing Us &gt;How to Invoice Us</td>
</tr>
<tr>
<td>How to invoice ACC</td>
<td>Home Page&gt;Health and Service Providers&gt;Invoicing Us &gt;How to Invoice Us</td>
</tr>
<tr>
<td>Enquire about a payment</td>
<td>Home Page&gt;Health and Service Providers&gt;Invoicing Us &gt;Sort Out a Problem with a Payment</td>
</tr>
<tr>
<td>How to complete your invoice with ACC’s purchase order information</td>
<td>Home Page&gt;Health and Service Providers&gt;Invoicing Us &gt;How to Invoice Us</td>
</tr>
</tbody>
</table>

Refer to the ISSC Service Schedule for service items and charges. The Service Schedule can be found on acc.co.nz>Resources by entering ISSC on the search function.

A named Provider must be referenced against every service item when billing. If the service is generic (e.g. the Administration and Management Fee), or a service that is not provided by a named Provider (e.g. Cultural Advice), then the lead Provider for that claim should be referenced.

Purchase orders

Purchase orders are issued by ACC allowing the Supplier to invoice for services rendered. Note that:
• Purchase orders are raised retrospectively for Getting Started once the Client Engagement Form has been submitted to ACC.

• Purchase orders are raised for onward services when reports are submitted to ACC which include details of Providers and an estimate of hours required for onward services.

• All services other than Getting Started and Early Planning require prior approval by ACC. Onward services shouldn’t be started until a purchase order has been received by the Supplier.

• The ISSC purchases services on actual time spent. Actual hours delivered should be invoiced up to the maximum hours available for the service purchased. In most cases the hours charged will be fewer than those approved in the purchase order.

• Where you use another ISSC Supplier’s Group-Based Therapy Provider a separate purchase order is raised for that ISSC Supplier.

• Invoicing should not be submitted for reports until ACC has received and is satisfied with the report.

Making a prior approval request

Most ISSC services require a prior approval before a Provider starts that service. Where prior approval is required, the request for prior approval is usually associated with the completion of an ACC report, which triggers the request for onward services. The exception to this is the Getting Started service.

This purchase order will be provided to you retrospectively.

<table>
<thead>
<tr>
<th>Onward service required</th>
<th>Prior Approval Triggered by:</th>
<th>Request will be actioned by ACC within:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Support to Wellbeing (short term)</td>
<td>Early Planning Report</td>
<td>Five business days</td>
</tr>
<tr>
<td>Support for Next Steps</td>
<td>Early Planning Report</td>
<td>Five business days</td>
</tr>
<tr>
<td>Supported Assessment</td>
<td>Early Planning Report</td>
<td>Five business days</td>
</tr>
<tr>
<td>Support to Wellbeing</td>
<td>Supported Assessment Report and if the Client’s claim is accepted by ACC</td>
<td>10 business days</td>
</tr>
<tr>
<td>Continuance of Support to Wellbeing</td>
<td>Wellbeing Plans, Progress Report (or Case Conference)</td>
<td>10 business days</td>
</tr>
<tr>
<td>Maintaining Wellbeing</td>
<td>Completion Report</td>
<td>n/a</td>
</tr>
</tbody>
</table>
The completion and submission of the Client Engagement Form will result in a purchase order being issued for the Getting Started service, as well as Early Planning if the Client is progressing past Getting Started.

If you urgently need prior approval you can request a purchase order for a prior approval service by contacting ACC via phone or email.

**Paying others**

You are responsible for having a process in place for paying:

- your approved Providers
- any cultural advisors engaged

Costs incurred for cultural advisors should be on-invoiced for the actual costs incurred or up to the maximum price paid as per the Service Schedule.

Do not add a margin or premium to the costs incurred for cultural advice, social work or group-based therapy.

The Supplier is not responsible for paying a Psychiatrist providing services under the Clinical Psychiatric Services (CLPS) contract as the psychiatrist will invoice ACC directly.

**Changing Supplier and Provider details**

You have an obligation to ensure your Approved Provider list remains accurate with ACC as:

- The web search needs to be updated to reflect changes.
- ACC needs to ensure the Supplier is meeting its obligations under the ISSC Service agreement.
- ACC may need to notify other Suppliers who use the same Provider if there is a performance issue that resulted in another Supplier removing a Provider from its list.

There are different forms to use depending on the details that need to be changed.

<table>
<thead>
<tr>
<th>Change required</th>

</tr>
<tr>
<td>Removing an Approved Provider</td>
<td>No form</td>
<td>This requires a formal letter signed by a duly authorised signatory advising that you want a Provider removed from your contract. You need to include the reason for removal. You should ensure that Clients are appropriately supported if their existing Provider ceases providing services under your contract. You may need to find a new service Provider or transition a Client to another Supplier.</td>
</tr>
</tbody>
</table>

In all cases completed forms and any supporting documentation will need to be sent via the Supplier to Health Procurement at ACChealthtenders@acc.co.nz.

If you have any queries regarding the use of these forms, contact health procurement at ACChealthtenders@acc.co.nz.

To add a new Provider to your ISSC contract you need to complete an ISSC Named Provider Application Form (a Tender Application Pack is available on the GETS website using the reference 17498447 request from Health Procurement email: ACChealthtenders@acc.co.nz). Relevant supporting documentation will need to be provided. Applications will be accepted throughout the year and will be evaluated every six weeks.
Quarterly Supplier Reporting

As part of measuring the overall performance of this service we require a quarterly report to be completed by ISSC Suppliers. We will contact you by email to provide information on access to the quarterly report form. This report will include: number of referrals in/out and declined, confirmation that capacity and coverage is maintained, any emerging trends and issues.

This will be part of the basis of ACC's monitoring and reporting for this service. We will not disclose commercially sensitive information to other Suppliers. Once the information has been compiled, we will extract the data from our systems, in conjunction with the Supplier’s data, and analyse and report on it.

The following table describes the Supplier reporting periods and due dates:

<table>
<thead>
<tr>
<th>Period start</th>
<th>Period finish</th>
<th>Submitted by</th>
<th>Summarised by</th>
</tr>
</thead>
<tbody>
<tr>
<td>24 November</td>
<td>28 February</td>
<td>20 March</td>
<td></td>
</tr>
<tr>

</tr>
</tbody>
</table>

Please note: To help provide support in the above two situations, the eBusiness Support Team sometimes needs remote access to the user’s computer. They do this using Team Viewer see [http://www.teamviewer.com/](http://www.teamviewer.com/). This is a software package for remote access. While not mandatory, it is something Providers might want to investigate for prompt resolution of any technical issues they may experience.
Reference documents

The following documents provide useful references for the ISSC Service:

- Service Schedule for Integrated Services for Sensitive Claims
- ‘Sexual Abuse and Mental injury; Practice Guidelines for Aotearoa New Zealand’ (known as the Massey Guidelines)
- ACC1625 Guidelines on Māori cultural competencies for Providers

Appendix 1: ACC funding and eligibility FAQs

This is a list of frequently asked questions that may help ISSC Suppliers and Providers in understanding ACC funding and eligibility as it applies to sensitive claims;

Please refer to the Definitions and Interpretation section where required.

1. **What constitutes a claim and what does ACC have to do to respond when a claim is lodged?**

   ACC legislation does not specify what is considered to be a claim but states a person must lodge a claim in a manner specified by the Corporation. ACC has a standard form, the ACC45, which is the standard mechanism to lodge a claim.

   When a ‘claim’ has been lodged, ACC must make a decision on whether to “cover” the claim and where cover has been established, to make a decision to provide entitlements to the Client, according to the Act.

   Under ISSC, a new sensitive claim can also be raised through an Engagement Form. This is the way Providers under the ISSC contract lodge a sensitive claim with ACC.

2. **Once a claim has cover what is the criteria for covering treatment costs?**

   ACC is required to pay for treatment when the purpose of the treatment is to restore the Client’s health to the maximum extent practicable, and the treatment is:

   - necessary and appropriate,
   - of the quality required,
   - performed for the necessary number of occasions,
   - performed at times and places that are appropriate,
   - provided by a suitably qualified and approved Provider, and
   - provided only after ACC has agreed to that treatment (where required).

   When deciding on a Client’s treatment, ACC must consider:

   - the nature and severity of the injury,
   - the generally accepted methods of treatment in New Zealand, and
   - Other options available in New Zealand, and the cost in New Zealand of both, compared to the benefit the Client is likely to receive.

   ACC generally determines the above criteria are being met from the reports sent to us by the treating Provider.

3. **How does Client eligibility for other ACC-funded services work?**
If a Client requires access to other ACC entitlements, they must have a “covered” claim. For definitions on what a “covered” claim is, please refer to the definitions section of this document.

It’s therefore important that if a Client needs to access other services such as financial compensation or social rehabilitation services, the Client is progressed through the initial pre-cover process in a safe, but timely manner. This will ensure that Clients are able to access other ACC entitlements in a timely way.

Many entitlements have eligibility criteria of their own, so it is important to liaise with ACC, who will determine whether a Client is eligible to receive a specific entitlement.

4. **Who can assess for mental injury?**

ACC assesses mental injury using assessors who meet the criteria in the ISSC Service Schedule and who have been approved to do this. The injury must be diagnosed by a mental injury assessor who meets ACC’s criteria which includes:

- qualification,
- training,
- experience in mental health and with survivors, and
- on-going requirements (i.e. Annual Practicing Certificate, Continuing Professional Development, supervision).

5. **Why does ACC need to know some of the details of the Client’s experiences of sexual abuse?**

For Clients to be eligible for cover under their claim, ACC needs to determine that the Client has experienced an event of sexual abuse or assault, or ‘certain criminal acts’, as listed in sections of the Crimes Act 1961 and Schedule 3 of the Accident Compensation Act 2001.

Secondly, ACC can only consider cover for injuries relating to events of sexual abuse that occurred in New Zealand or overseas but whilst the Client was classified as ordinarily a resident of New Zealand. Please note that there is no requirement for the perpetrator to be charged with a crime for the Client to be considered for cover under an ACC claim.

When issuing a decision whether to accept or decline a claim for a mental injury, ACC determines whether the sexual abuse event (or events) is a significant cause of a clinically significant injury. This is usually established within a mental injury assessment (the Supported Assessment service under the ISSC).

6. **How does an assessor determine the injury is clinically significant?**

To be clinically significant the injury may be diagnosed using:
- Diagnostic and Statistical Manual of Mental Disorders (DSM IV or 5), or
- International Classification of Diseases (ICD10), or
- Psychodynamic Diagnostic Manual (PDM), or
- Diagnostic Classification of Mental Health and Developmental Disorders of Infancy and Early Childhood (DC:0-3R).
Appendix 2: Definitions and interpretations

In this service schedule, when we use the terms listed in this section, they have the meaning given below:

**Active disengagement**

A Client who has been receiving services under this Service Schedule stops accessing these services before they have completed that current component of service. Active disengagement includes Clients who have not commenced services that have been approved.

**Approved Service Provider**

An Approved Service Provider refers to a suitably qualified and experienced therapist, or practitioner who:

- delivers services, usually of a therapeutic nature, to Clients;
- has a professional relationship with the Supplier; and
- is named in Appendix 4 of the ISSC Service Schedule;

Approved Service Providers will meet the criteria for one or more aspects of service delivery and these will be detailed in Appendix 4 of the ISSC Service Schedule. An Approved Service Provider will be approved to provide one or more of the following services depending on their qualifications and experience:

- Assessment
- Treatment
- Group-based therapy (in addition to treatment)
- Incapacity assessment (in addition to an assessment)
- Social work (separate from treatment).

**Assessment**

An assessment carried out and documented by a suitably qualified Approved Service Provider for a range of purposes, including for example, to support ACC’s cover determination, to access to an entitlement such as weekly compensation, to review the appropriateness of on-going treatment, or to assess or review medication.

**Child, Adolescent and Young Person**

Child – defined by the Children, Young Persons, and Their Families Act 1989 as a person under the age of 14 years. ACC defines a child as anyone under the age of 17 years.
Adolescent – WHO identifies adolescence as the period in human growth and development that occurs after childhood and before adulthood, from ages 10 to 19.

Young Person – defined by the Children, Young Persons, and Their Families Act 1989 as a person of or over the age of 14 years but under 17 years.

**Claim**

The name given to an application made by the Client (or made by someone on behalf of the Client) under ACC legislation for cover of a personal injury.

**Cover**

When ACC refers to a Client who has cover it means that the Client has cover for a personal injury under ACC legislation.

**Decline**

An action ACC takes when making a decision not to provide cover or entitlements under a Client’s claim.

**Entitlements**

The entitlements provided under ACC legislation include: rehabilitation (comprising of treatment, social rehabilitation and vocational rehabilitation), weekly compensation (which includes first week compensation in some circumstances) and Lump Sum compensation for permanent impairment. Although these are the main entitlements available to sensitive claims Clients, other entitlements are listed under ACC legislation.

**Client Engagement Form**

An electronic form developed as an alternative to a claim form (the ACC45) for sensitive claims. ISSC Providers will use this form to collect information that ACC will use to either lodge a new claim or to associate this period of service to the appropriate existing claim. This form has been designed specifically for sensitive claims and only collects the information that is relevant and necessary for ACC at this early stage of service.

**Face to face**

In person, which may include video conferencing with prior approval from ACC. Please note that approval will only be given if both the Approved Service Provider and the Client are in New Zealand and, that ACC is satisfied of the validity of this approach in the current therapeutic environment. Note – ACC has developed some guidelines to support Tele-psychology. These are available from the acc.co.nz website.

To request approval, please email ACC with your request clearly explaining why it would be appropriate.
**Incidents**

Something you are required to notify ACC of immediately. These include:

(a) An occurrence that is clearly outside accepted professional practices that might have been raised by a Client or another person. (Another person may be a staff member, a member of the public or a member of the Client’s family);

(b) An unacceptable risk to the safety and security of the Client, or another party involved in Service provision;

(c) A situation that could become high profile or attract media/advocacy group attention; or

(d) Any other situation that ACC can reasonably expect to be advised of.

For example, incidents include:

(a) The death of a Client.

(b) Verbal, physical or sexual abuse or assaults by a Client on staff or fellow Clients or vice versa.

(c) Media reports illustrating a Client’s situation.

(d) Breach of organisation rules that may result in the Client being evicted from a facility.

(e) The Client leaving a facility without permission.

(f) The Client being hospitalised.

Any other events that would indicate the Client may be a safety and/or security risk to themselves or others.

**Integrated Services for Sensitive Claims (“ISSC” or “the Service(s)”)**

The group of services or any service described in these guidelines.

**Lead Service Provider**

Where there is more than one Approved Service Provider involved in delivering services for a Client, The Lead Service Provider is the Provider who takes responsibility for the day-to-day service delivery for a Client.

**The Massey Guidelines**

A publication commissioned by Accident Compensation Corporation from the Massey University School of Psychology called *Sexual Abuse and Mental Injury: Practice Guidelines for Aotearoa New Zealand* (2008).
Mental injury

A clinically significant behavioural, cognitive or psychological dysfunction.¹

Personal injury

Personal injury means:

(a) the death of a person; or

(b) physical injuries suffered by a person, including, for example, a strain or a sprain; or

(c) mental injury suffered by a person because of physical injuries suffered by the person; or

(d) mental injury suffered by a person in the circumstances described in section 21 of the AC Act 2001; or

   work-related mental injury that is suffered by a person in the circumstances described in section 21B AC Act 2001; or

(e) damage (other than wear and tear) to dentures or prostheses that replace a part of the human body.

Pre-cover

The term ACC uses to describe the period from when a Client lodges a claim, to when ACC issues a decision on whether to accept or decline the claim.

Primary services

The suite of basic end-to-end services that you must be able to deliver as described in Appendix 1 of the ISSC Service Schedule.

PWI

The acronym for the Personal Wellbeing Index, a suite of subjective wellbeing outcome measures.²

Returning Client

A Client who has previously lodged a claim and received some level of service and who has returned to ACC for further services. This includes Clients who have disengaged

---

¹ Section 27, Accident and Compensation Act 2001 no 49.

before the completion of therapy, and Clients with claims that have previously been declined.

**Secondary services**

Services that can be provided in addition to Primary Services, where those services are set out in Appendix 4 of the ISSC Service Schedule.

**Session**

Refers to a one-hour therapy session, unless otherwise specified. Sessions usually last an hour and are made up of 50 minutes face to face with the Client and 10 minutes to complete documentation for the session and/or other session-related activities.

**Support services**

A suite of services that can be accessed to support face-to-face therapy including social work, family/whānau support, active liaison and cultural advice.

**Therapy or counselling or treatment**

Interchangeable terms referring to a mode of professional involvement in which the focus is on improved mental health and the enhancement of personal, social, emotional and functioning life.

**TAs**

Territorial Authorities: TAs are areas defined by government. ACC uses TAs within the ISSC service to define what Suppliers cover what areas. Suppliers need to have Providers based in all TAs for which they hold the contract.

**WHODAS 2.0**

The acronym for World Health Organisation Disability Assessment Schedule (second edition), a functional outcome measure.³
