

PUBLIC TRANSPARENCY REPORT
2025

Accident Compensation Corporation

Generated 24-11-2025

About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

ACC is required by an Act of Parliament to invest as if it were a trustee and to avoid prejudice to New Zealand's reputation. ACC's ethical policy, reviewed annually and owned by the Board, guides our responsible investment. We manage our investments to achieve the best possible balance of return and risk while fulfilling our ethical obligations. ACC's ethical policy aims to represent the ethical views of the majority of New Zealanders, recognising that there can be varied perspectives on ethical investment principles. ACC considers the laws of New Zealand as reflecting the principles held by a substantial majority of the New Zealand public. Additionally, ACC considers global ethical initiatives that are likely to be supported by a substantial majority of the New Zealand public, especially where these initiatives are endorsed by the New Zealand government.

ACC is also guided by its roles in both the health sector and the investment community. ACC draws on multiple organisations and collaborations to inform its approach to responsible investing. ACC is a signatory to the Principles for Responsible Investment (PRI). ACC also uses the principles of the United Nations Global Compact when considering whether companies are operating in accordance with minimum standards for responsible corporate behaviour. In addition, ACC is part of a formal collaboration, focussed on all aspects of ethical investment, with New Zealand's other Crown Financial Institutions (CFIs).

ACC incorporates ethical factors into its investment activities to identify, mitigate, and manage risks that could affect the fund. Strong responsible investment practices also help to protect the reputation of ACC and deepen the trust of stakeholders in ACC.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Over the past year, ACC completed its first report in line with the Aotearoa New Zealand Climate Related Disclosure regime. As part of the 2024 climate change report, ACC expanded its carbon footprint reporting to include corporate bonds and private markets. The ACC Board has established interim carbon intensity reduction targets for listed equities: a 60% reduction by 2025 and a 65% reduction by 2030, using a 2019 baseline. ACC expects to meet the 2025 reduction target and is well on track to meet the 2030 reduction target. ACC and the other New Zealand CFIs launched a collaborative initiative to engage on climate change with companies listed on the NZX50 in 2023. The CFIs released a joint position paper and wrote to the Chairs of NZX50-listed companies. By December 2024, the collaboration had finished the first phase of direct engagements with the ten prioritised companies. The CFIs produced a summary of findings for phase one.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

ACC's responsible investment plans include the following:

- Continue to develop and improve the approach to responsible investment integration across the Fund.
- Expand carbon footprinting reporting in line with standards. In 2025, sovereign bonds will be included in our carbon footprint reporting.
- Expand and improve progress reporting in line with standards.
- Engage with portfolio managers and reduce carbon budgets in line with carbon reduction targets.
- Expand our stewardship to include reporting on aggregate voting statistics.
- Plan and execute phase 2 of the collaborative CFI climate change engagement programme.

Additional context to your response(s): (Voluntary)

As stated in our policy, we follow the UN Guiding Principles (UNGP) on Business and Human Rights [Global], but we do not formally report on this outside our policy. Since 2021, we have reported annually drawing on the recommendations of the Taskforce for Climate-related Financial Disclosure (TCFD) [Global]. In 2024, this was replaced by a report aligned with the New Zealand Climate Related Disclosure Standards, which was developed based on the TCFD and follows the framework structure.

Does your organisation have governance processes or structures to ensure that your overall political engagement is aligned with your commitment to the principles of PRI, including any political engagement conducted by third parties on your behalf?

(A) Yes

Describe how you do this:

As a signatory, ACC has made a public commitment to implement ESG policies, and to report on these policies and their implementation. ACC engages, where appropriate, with companies whose securities are (or could be) held in ACC portfolios which have serious ESG issues relative to the standards specified in the UN Global Compact, and which ACC believes would be regarded as unethical corporate behaviour by a substantial majority of the New Zealand public. Our ethical considerations extend to Sovereign Governments. ACC will not invest in the government bonds of a nation state if that investment would prejudice New Zealand's reputation as a responsible member of the world community. The New Zealand government is best placed to form official views on the impact on New Zealand's international reputation of commercial dealings with a state. The New Zealand government is also more able to judge whether it would be better to engage with a government to improve its practices than isolate it. We exclude from investment the bonds of any government where:

- There is widespread condemnation or sanctions of that government by the international community; and
- The New Zealand government has meaningful diplomatic, economic or military sanctions aimed at that government Our service provider's (Columbia Threadneedle) positions around environmental, social, and corporate governance practices are laid out in their publicly available policy statements and our internal policy refers to this relationship. These positions get reviewed annually by Columbia Threadneedle's Responsible Investment Team, and approved by the Global Investment Committee, which is chaired by the CIO. All public policy engagement is aligned with these efforts.

As stated in our policy, engagement is an important part of ACC's stewardship efforts and we prioritise ESG issues based on materiality and where we believe we are most able to influence change. The CIO has oversight of our engagement activities that lie within the ethical policy boundaries. Any engagement activities outside this policy are to be approved by the ACC Board Investment Committee.

ACC endeavours to identify activities that, while not unlawful, are otherwise likely to be regarded as unethical by a substantial majority of the New Zealand public. ACC takes into account those global ethical initiatives that it considers reflect the views of a substantial majority of the New Zealand public, especially if those initiatives are supported by the New Zealand government. For instance, ACC believes that involvement in the processing of whale meat is not consistent with the International Convention for the Regulation of Whaling, to which New Zealand is a signatory – and does not permit direct investment in such activities.

When gauging the ethics of an activity ACC also considers its role in New Zealand society, in the health sector and in the investment community. For instance, the ACC Board believes that directly investing in tobacco companies is inconsistent with ACC's role in the health sector.

How does your organisation, or the external service providers or external managers acting on your behalf, prioritise the investees or other entities on which to focus its stewardship efforts?

Engagement is an important part of ACC's stewardship efforts. While all material ESG issues are in scope, a significant amount of ACC's engagement effort is focused on governance. We prioritise other ESG issues based on materiality and where we believe we are most able to influence change. ACC is likely to engage with New Zealand and Australian companies directly or in collaboration with other Crown Financial Institutions. Elaborate on your organisation's default position on collaborative stewardship, or the position of the external service providers or external investment managers acting on your behalf, including any other details on your overall approach to collaboration.

In 2009, ACC signed an agreement with the Guardians of New Zealand Superannuation and Annuitas to collaborate and share resources on ethical investing. In 2021, this was reinforced by the Crown Responsible Investment Framework (CRIF). Each Crown Financial Institution (CFI) retains responsibility for their individual ethical investment policies and decisions. ACC is likely to engage with New Zealand and Australian companies directly or in collaboration with other Crown Financial Institutions. Engagement with companies further afield is more likely to be in collaboration with other investors, or through external engagement specialists. While our engagement service provider, Columbia Threadneedle Investments, generally prefers to engage issuers in private to enable honest, open, and frank discussions to take place, collaboration with other investors or stakeholders might be an impactful engagement or escalation strategy. Given ownership of an issuer is often dispersed, for a stakeholder's voice to have weight it may require collaborative engagement to address issues effectively at the issuer or industry level. Columbia Threadneedle Investments supports dialogue amongst investors and collaborative engagement on a case by case basis where this contributes to the creation and protection of stakeholder value.

CLIMATE CHANGE

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

- (A) Yes, within our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

Physical risks include the risk of more frequent and severe events, such as large storms and wildfires, as well as chronic climate change risks such as rising sea levels. They can have financial implications for businesses in many ways including: by damaging property and infrastructure; disrupting supply chains, business operations, and workforce, and by causing food production losses. Transition risks are more material now and arise from changes in policy and law, new technologies, and shifts in consumer and company behaviour as the world responds to climate change. Over the short-to-medium term transition risks are expected to be the more material of the climate risks. Changing climate policy, regulatory, infrastructure, and technological developments, litigation and growing public support for the transition can be expected to impact companies as they transition. Climate Change is considered a systemic risk. This is because local climate change events can, through interlinked systems, have far reaching impacts - economic, financial, social, environmental - having the potential to threaten broad instability.

- (B) Yes, beyond our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

Transition risks which stem from changes in policy and law, new technologies, and shifts in consumer and company behaviour. Over the short-to-medium term transition risks are expected to be the more material of the climate risks. Physical risks are present now but are expected to become increasingly material over the longer term, especially without mitigation, and can be expected to vary significantly by sector and location. They are expected to continue beyond our standard planning horizon of 20 years.

- (C) No, we have not identified climate-related risks and/or opportunities affecting our investments

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

● (A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Our 2020 commitment to align the fund with a net zero world by 2050, and our strategy to achieve the target, satisfies our fiduciary requirement to invest as if a trustee, as well as our commitment to avoid prejudice to New Zealand's reputation. Our climate strategy incorporates best practice and is flexible and resilient. It focuses on managing climate change risks in a way that ensures Board and management oversight of key metrics, achieves our carbon-intensity reduction targets and supports our managers and investee companies in managing, mitigating and adapting to climate change. The Board has set targets to reduce carbon intensity by 60% by 2025 and 65% by 2030 compared to a 2019 base year. ACC has imposed annually declining carbon caps on external and internal portfolio managers, in line with achieving the carbon-intensity targets.

ACC has introduced low carbon benchmarks for our internal listed equity portfolio managers and for global equities. Because we do not see thermal coal playing any role in this transition, we do not invest in companies generating a large proportion of their income from thermal coal. Our Investments team believes that the consideration of climate-related financial risks under different scenarios requires a bottom-up assessment of portfolios. ACC relies on portfolio managers to understand the relative exposures of sectors and geographies as well as how companies manage, mitigate and adapt to exposures to climate-related financial risks, under a range of scenarios. As well as the bottom-up analysis we are using MSCI's Climate Value at Risk (Climate VaR) model as a climate scenario analysis tool to assess the financial impact of climate risks on our listed equity portfolio under different scenarios.

- (B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products

Which sectors are covered by your organisation's strategy addressing high-emitting sectors?

☑ (A) Coal

Describe your strategy:

Exclusion of companies generating at least 30% of revenue from thermal coal. ACC also uses a broad-based approach to measuring emissions that captures and targets reductions in direct emissions, emissions from energy use, and the fossil fuel emissions of those companies responsible for fossil fuel extraction and burning for energy, including scope 3 for fossil fuel companies. We use this approach to measure and monitor emission reductions in the carbon intensity of the listed equity portfolio. Using these measures, ACC can assess what sectors and companies are the main contributors to climate risk and monitor changes in emission intensity.

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

(A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

Our Investments team believes that the consideration of climate-related financial risks under different scenarios requires a bottom-up assessment of portfolios. ACC relies on portfolio managers to understand the relative exposures of sectors and geographies as well as how companies manage and mitigate exposures to climate-related financial risks, under a range of scenarios. As well as the bottom-up analysis we are currently using the MSCI's CVar model to indicate the potential value impact of climate risks under different scenarios.

(2) Describe how this process is integrated into your overall risk management

Tracking portfolio emissions is key. Reliable emissions data enables us to monitor emissions across companies, sectors and regions as well as establish appropriate carbon budgets for our managers. We require our managers to consider all investment risks, including climate, when making investment decisions. ACC engages regularly with external and internal equity portfolio managers to assess their progress in integrating climate change into their investment strategies. We also assess how they are engaging with companies to manage climate risks and reduce their carbon emissions. Ensuring oversight and management of risks, including climate risk, is also a key consideration when appointing new managers and monitoring the performance of existing managers. We include manager monitoring and management of ESG risks, including climate-related risks, in our external manager selection criteria as well as our ongoing manager monitoring process. The approach our external portfolio managers are taking to manage and mitigate ESG risk in their portfolios is reviewed annually. ACC engages regularly with external and internal equity portfolio managers to assess their progress in integrating climate change into their investment strategies. We also assess how they are engaging with companies on climate change.

(B) Yes, we have a process to manage climate-related risks

(1) Describe your process

We are decarbonising our portfolios. We engage with investee companies through a number of channels. We actively engage in the local market, we engage in collaboration with peer Crown Financial Institutions, and use Columbia Threadneedle Investments as an engagement specialist. In 2022/23, ACC along with the other CFI's, launched a climate change engagement program, using our collective influence to engage directly with New Zealand's largest companies. The key elements of the program include a CFI position statement published on our website, a letter to the Chairs of companies listed on the NZX50 and engagement with priority companies. In 2024 we completed our first round of engagements with 10 companies. ACC investments risk team oversees our operational and investment related risks and has robust operational processes in place to monitor the risk in our portfolio, including climate related risk. The risk team report regularly on portfolio risk to the Board Investment Committee.

(2) Describe how this process is integrated into your overall risk management

ACC engages regularly with external and internal equity portfolio managers to assess how they are engaging with companies on ESG risks including climate change, and receive quarterly reports from our engagement specialist. ACC investments risk team has robust operational processes in place to monitor the risk in our portfolio, including climate related risk. The risk team report regularly on portfolio risk to the Board Investment Committee.
