

9 May 2022

Kia ora [REDACTED]

**Your Official Information Act request, reference: GOV-017820**

Thank you for your email of 16 April 2022, asking for the following information about workplace exposure under the Official Information Act 1982 (the Act):

*I'd like a breakdown of claim data, looking at the workplace exposure claims across the country.*

- *The last 20yrs,*
- *By Month*
- *By Region*
- *By Location (for high claim area's)*
- *I'd also like a breakdown of data, looking at which claims are related to issues with respiratory, breathing, heart, lung, cancer, headache, fatigue, blood, infection, poisoning, disease, illness, exposure, welding fumes, heavy metals, solvents, gases, organic, non organic, particulate, contaminates, toxins, inhalation, ventilation, air quality, lack of PPE, miss use of PPE etc, or any other similar types, such as those linked to items listed on "schedule 2"*
- *Please also provide a count / qtr / yr of claim's associated with each item listed on "schedule 2", claims made, claims approved, claims declined, claims that went to hearing, claims that were investigated, claims that were directed to worksafe or other for inputs.*
- *total amounts paid out for each item / qtr / yr on the list "schedule 2".*

On 20 April 2022, we contacted you to clarify your request and advised what information ACC can provide. You responded the same day confirming you were satisfied with workplace injury information broken down by primary injury, cause, and injury site for the previous 10 years.

**Data for workplace exposure claims is attached to this letter as Appendix 1**

Note that not all data about a claim is available in a reportable form as some claim-related information is only available in the form of medical notes from treatment providers and assessors, which are stored as PDF documents on individual claim files. This means that the detailed information is available to Recovery Team members when managing a claim but is not available for reporting. This is particularly true for claims that are less common but more complex, such as the work-related gradual process claims you have asked about.

**We are unable to provide claim counts fewer than four**

ACC does not routinely disclose claim counts fewer than four, or costs less than \$100. Accordingly, some values in the table only indicate that the claim count is fewer than four (denoted as <4) or a payment was less than \$100 (denoted as <\$100). This limits the potential for particular individuals or matters specific to certain individuals from being identified.

Withholding the data in this way is necessary to protect our clients' privacy. This decision has been made under section 9(2)(a) of the Act. In doing so, we have considered the public interest in making the information available and have determined that it does not outweigh the need to protect our clients' privacy.

**As this information may be of interest to other members of the public**

ACC has decided to proactively release a copy of this response on ACC's website. All requester data, including your name and contact details, will be removed prior to release. The released response will be made available [www.acc.co.nz/resources/#/category/12](http://www.acc.co.nz/resources/#/category/12).

**If you're concerned about this response, please get in touch**

You can email me at [GovernmentServices@acc.co.nz](mailto:GovernmentServices@acc.co.nz). If you are not happy with this response, you can also contact the Ombudsman via [info@ombudsman.parliament.nz](mailto:info@ombudsman.parliament.nz) or by phoning 0800 802 602. Information about how to make a complaint is available at [www.ombudsman.parliament.nz](http://www.ombudsman.parliament.nz)

Ngā mihi

Government Engagement & Support

**Sheet:**

**Description:**

*Workplace exposure claims data*

**Caveats and Notes:**

- Schedule 2 claims are included where the cover decision is accepted or declined. All other claims are included where they are accepted for cover.
- Accredited employer claims are not included.
- All claims are identified as work related where they are funded under the Work account or the at work indicator is 'Y'.
- Exposure claims have been identified where the claim is flagged as having cover under schedule 2, has a gradual process flag or has a diagnosis of 'Industrial Deafness', 'Inhalation / Ingestion Specific Occurance' or 'Occupational Disease'.
- Region and Territorial Authority are based on the location of the accident and are not necessarily where the client resides or sought treatment.
- New claims are counted where the claim was lodged by ACC between 1 January 2007 and 31 December 2021. A claim may be lodged immediately following an accident or at any later stage.
- Please note that ACC moved to a new claim management system in 2007 and while every attempt was made to migrate prior claims, not everything could be migrated across which has lead to unreliability in numbers and breakdown of these claims. Due to this, data prior to 2007 has not been provided here. Furthermore, reliable review data is only present back to 2012 and we have therefore only been able to provide review data back to this date.
- Data has been displayed in calendar years, i.e. 1 January to 31 December.
- Active claims are counted where a claim received at least one payment between 1 January 2007 and 31 December 2021. A claim was not necessarily lodged or had the accident occur within the same time period.
- A claim may be active in more than one calendar year and, in tables 8 and 10, a claim will be counted once for each relevant year.
- Costs are exclusive of GST.
- Costs are provided as at payment date which may differ from the date of service.
- Costs do not include any payments made for Public Health Acute Services. These are payments made to a public hospital during the acute phase of an injury and are paid as an annual bulk payment by ACC to the Crown. As such, payments cannot be attributed to individual claims.
- In the interest of client privacy, suppressed data has been provided with <4 where claim counts of less than four claims. In additon, claim costs less than \$100 have been withheld and denoted as <\$100.
- Data was extracted 28 April 2022 and may differ if re-run later.
